#### 1. INTRODUCTION

AstroBank Public Company Limited (the "Bank") was incorporated as a private limited liability company, in accordance with the provisions of the Cyprus Companies Law, Cap. 113. The presence of AstroBank Public Company Ltd (ASTROBANK) (Former Piraeus Bank (Cyprus) Ltd) commenced back in 2008 when it was incorporated and licensed by the Central Bank of Cyprus (CBC) to carry out banking activities in accordance with the requirements of the Banking Law of 1997. The Bank was a wholly owned subsidiary of Piraeus Bank S.A, a company incorporated in Greece and listed in the Athens Stock Exchange, which held 100% of the Bank's share capital, up until the 28th of December 2016. As from 28th of December 2016, the Bank is owned by a number of investors, none of which, has a direct or indirect controlling interest on the Bank. On 30th March 2017, the Bank changed its name from Piraeus Bank (Cyprus) Ltd to ASTROBANK Limited and subsequently to ASTROBANK Public Company Limited.

On 18 January 2019, the Bank acquired the Banking business of USB Bank Plc. Following this acquisition, the Bank's balance sheet grew by more than 50% thus providing the combined Bank with substantial opportunities for economies of scale and future growth. The Bank is now the largest of the Less Significant Credit Institutions. The principal activities of the Bank during the year continued to be the provision of banking and financial services. The principal activities of the Bank's property subsidiaries, which are unchanged from last year are the holding, administration and disposal of property acquired by the Bank in debt satisfaction. A separate subsidiary is also used as an insurance broker.

The Bank provides banking and financial services through its branch network. As at 31 December 2021, the branch network included 14 Retail Banking branches, 3 Service Centers for Large Corporate Companies, 1 Shipping Unit, 1 Service Center for SMEs, 1 Private Banking Service Centre and 5 Service Centers for International Business Services, as well as a representative office in Moscow. The Bank is currently examining whether to terminate the operations of its Moscow Representative Office due to the developments of the Russia-Ukraine war. With its network of the Retail branches throughout Cyprus, the Bank is well established in the local market, offering a complete package of innovative and technologically advanced products and services that meet the needs of its local and international customers. The Bank's operations are based on four axes:

- Retail Banking
- Corporate / Business Banking
- Private Banking
- International Corporate Banking

The Bank is a Less Significant Credit Institutions and it has been designated by the CBC as an "Other Systemically Important Institution (O-SII) since October 2019. The Bank is subject to supervision by the CBC for the purposes of prudential requirements.

#### 2. SCOPE OF APPLICATION

The following information represents the Pillar III disclosures of the Bank for the year ended 31 December 2021, in accordance with the requirements of the Capital Requirements Regulation No. 575/2013 (the CRR) and the Capital Requirements Directive 2013/36/EU (the CRD IV), as amended by Regulation (EU) 2019/876 (the CRR II) and Directive (EU) 2019/878 (the CRD V), respectively. The

preparation of these disclosures was in line with the European Banking Authority (EBA) guidelines on Pillar III disclosures requirements, where applicable. The Bank's policy is to meet all Pillar III disclosure requirements as detailed in the CRR II. The Pillar III disclosures are published on an annual basis on the Bank's website <u>https://www.astrobank.com</u>

The Bank prepares the Pillar III disclosures on annual basis and these are approved by the Board of Directors, following review and verification by the Bank's Internal Audit Department. The present disclosures have been prepared on a stand-alone basis, as per the stand-alone audited financial statements of the Bank for the year ended 31 December 2021.

#### Consolidation

The Audited Consolidated Financial Statements for the year 2021 were approved by the Board on 23 May 2022. The disclosures herein have been prepared based on the separate financial statements of the Bank as the subsidiary companies have not been consolidated for regulatory purposes. The Bank in its normal course of business acquires properties in debt satisfaction ("REOs"), which are held either directly or by entities set up and controlled by the Bank for the sole purpose of managing these properties with an intention to be disposed of. The main activities of the Investment Property subsidiary companies is the holding and administration of property acquired by the Bank in debt satisfaction. The Intermediate holding companies own shares of Investment property, reflecting the substance of these transactions. The basis of consolidation of all group entities for accounting and prudential purposes is presented in Annex I.

#### 3. RISK MANAGEMENT FRAMEWORK AND GOVERNANCE

As a financial institution, the Bank is exposed to a number of risks, which mainly consist of Credit and Counterparty Credit Risk, Market and Liquidity Risk and Operational Risk. The Bank monitors and manages these risks through various control mechanisms, based on a risk management framework that focuses on the unpredictability of the economic environment in which it operates and which at the same time seeks to minimize potential adverse effects on its financial performance.

Risk management policies are established to identify and analyze the risks faced by the Bank, to set appropriate risk limits and controls, to monitor risks and to ensure adherence to limits. The risk management policies are reviewed regularly to reflect changes in market conditions as well as in the Bank's activities.

#### 3.1 Risk Management Framework

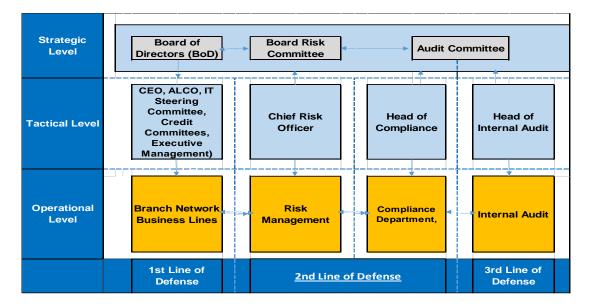

A well-documented risk management framework underpins the consistent definition of policies and processes adopted by the Bank for all risk taking activities. Constant improvement and effective implementation of the Bank's risk appetite framework ensures that the risks taken by the Bank, are aligned with its strategic objectives, meet Regulators' requirements and protect the interests of all stakeholders, hence aim at highest possible profitability while maintaining adequate solvency, ensuring the long term viability of the Bank. The Bank ensures the evaluation of the potential loss level via stress testing, taking into consideration market conditions.

The Board of Directors (BoD), the Board Committees and the Executive Management are responsible for the establishment of a strong risk management culture across all activities and hierarchical levels

of the Bank. The BoD, through the Risk Management Committee (RMC), has the responsibility for approving and reviewing the Bank's risk profile and appetite as well as its Risk Management Framework and policies ensuring that Executive and Senior Management take all steps necessary to monitor and control risks in accordance with the approved strategies.

Risk management is an integral part of good governance and the Bank acknowledges the need to implement a holistic and structured process for assessing and managing corporately its exposure to risks. To this end, the Bank applies a model of defined roles and responsibilities regarding the management of risk (defense lines), in line with the regulatory framework for evaluation of the organization of internal control systems (CRD IV), the relevant EBA Guidelines on Internal Governance (EBA/GL/2017/11) and with best banking practices. Risk governance is organized in two key dimensions that generate a governance matrix in which the CEO, Executive Management, Units, Committees and Management Body are located according to (a) the line of defense to which their activities belong to and (b) their hierarchical level.

The organizational structure is presented schematically in the following diagram:

Within all three lines of defense appropriate internal control procedures, mechanisms, processes are in place. The Branch Network and Business Lines, as the first line of defence, have a significant role in ensuring robust risk management and compliance within an institution. The business lines are supported by the appropriate processes and controls in place that aim to ensure that risks are identified, analysed, measured, monitored, managed, reported and kept within the limits of the institution's risk appetite and that the business activities are in compliance with external and internal requirements.

The Risk Management Department and Compliance Department form the second line of defense. The risk management function facilitates the implementation of a sound risk management framework throughout the institution and has responsibility to further identifying, monitoring, analysing, measuring, managing and reporting on risks and forming a holistic view on all risks on an individual and consolidated basis.

The Compliance Department monitors compliance with legal and regulatory requirements and internal policies, provides advice on compliance to the management body and other and establishes policies and processes to manage compliance risks and to ensure compliance. Both Departments may intervene to ensure the modification of internal control and risk management systems within the first line of defense where necessary. The independent Internal Audit Department, as the third line of defence, conducts risk-based and general audits and reviews the internal governance arrangements, processes and mechanisms to ascertain that they are sound and effective, implemented and consistently applied. The Internal Audit Department is in charge also of the independent review of the first two lines of defence.

#### 3.2 Board of Directors

The Board of Directors (BoD) is the supreme governing body. As at 31 December 2021 the Board consisted of one Executive director and six Non-Executive directors, of which four were also Independent. The Board is chaired by an Independent Non-Executive director.

During 2021 and until the date of this Report the following changes to the BoD took place:

- Mr George Kourris, who was the Senior Independent Director, resigned on 22 April 2021.
- Mr Hikmat Abou Zeid, who was a Non-Executive Director, resigned on 10 December 2021.
- Mr Michalakis Sarris, who was appointed as an Independent Non-Executive Director on 24 September 2021, was appointed as Chairman on 15 December 2021.
- Mr Shadi Karam the Independent Non-Executive Chairman resigned on 15 December 2021
- Mr Maurice Sehnaoui, who was a Non-Executive Director, resigned on 19 July 2022.
- Ms Evi Rossidou Antoniadou was appointed on 15/06/2022 and
- Mr William J. Gallagher was appointed on 05/08/2022.

The constant pursuit of the Board is to enhance the long-term economic value of the Bank and the defence of its general interests by always applying the provisions of the institutional framework, its internal regulations and the principles of corporate governance. The Board is mainly responsible for charting the strategy, establishing policies and monitoring compliance with them, as well as, for the overall supervision of the work and the activities of the Bank.

More specifically, the role and responsibilities of the Board include the following:

- To approve the Bank's Business Strategy, including the risk appetite framework, prioritizing the current and future goals, as well as the annual budget and planning for the allocation of use of the Bank's capital.
- To approve and oversee the implementation of risk strategy, including the approval of risk policies as well as of the ICAAP (Internal Capital Adequacy Assessment Process), ILAAP (Internal Liquidity Adequacy Assessment Process) and Recovery Plan documents. Ensure the integrity of the accounting and financial reporting systems, including financial and operational controls and compliance with the law and relevant standards.
- To approve the governance structure of the risk management framework.
- To monitor and periodically assess the effectiveness of the Bank's governance arrangements and take appropriate measures to address any deficiencies.
- To evaluate governance decisions or practices to ensure they:

- $\circ~$  are not in breach of the provisions of the CRR and all other applicable legislation and standards
- are not detrimental to:
  - the sound and prudent management of the Bank
  - the financial health of the Bank
  - the legal interests of the Bank's stakeholders.
- To appoint the members of the Board Risk Committee, following the approval and recommendation of the Nomination and Remuneration Committee and delegate authority to it and the Risk Management Department, as appropriate, for developing the risk management strategy, policies and supporting methodologies.
- To appoint the members of the Board Audit Committee, following the approval and recommendation of the Nomination and Remuneration Committee. The Audit Committee is responsible for the monitoring and assessment of the adequacy and effectiveness of internal control and information systems.
- To appoint the members of the Board Nomination and Remuneration Committee, which is responsible for the remuneration policies and practices as well as for the incentives for managing risks.
- To oversee and ensure the effective and consistent implementation of risk management policies and supporting methodologies at the business line level.
- To promote a risk awareness culture and common risk terminology across the Bank.
- To provide appropriate resources and means for effective risk management.
- To review and approve business objectives and ensure that these are in line with the Bank's appetite to Credit, Market, Liquidity and Operational Risk tolerance levels.
- To monitor risk-adjusted performance against business objectives, strategies and plans.
- To ensure that an independent risk management framework is in place in which risks are assessed effectively, objectively and in a timely manner.

During 2021, the Bank's Board of Directors held nine meetings.

In the context of achieving continuous improvement and proper management of the Bank, the Board delegates a number of its responsibilities to various Board Committees, as further analyzed in the section that follows.

#### 3.3 Board Committees

#### 3.3.1 Risk Management Committee (RMC)

The Board has appointed the Risk Management Committee ("RMC"), as the highest authority assisting the Board for risk management in the Bank. As at 31 December 2021 the RMC comprised of three Independent Non-Executive directors. Its terms of reference are approved by the Board. Members of the RMC have appropriate knowledge, skills and expertise to fully understand and monitor the risk strategy and the risk appetite of the Bank.

The Board Risk Committee's mission is to:

• Assist the management body in overseeing the effective implementation of the risk strategy by the Executive Management including:

- (i) the development of mechanisms to ensure material exposures that are close to, or exceed approved risk limits are managed and, where necessary, mitigated in an effective and timely manner;
- (ii) the identification and escalation of breaches in risk limits and of material risk exposures in a timely manner.
- Establish the strategy of taking any form of risk and managing capital in a way that serves the business goals of the Bank and ensures the adequacy of the available resources in technical means and staff.
- Provide for the development of an internal risk management framework and its integration in the business decision-making process.
- Determine the principles for managing risks concerning their identification, projection, measurement, monitoring, audit and treatment, in accordance with the business strategy in force and the adequacy of the available resources.
- Assess annually, on the basis of the annual report of the Head of the RMD:
  - the adequacy and effectiveness of the Bank's risk management framework and supporting policies, and the compliance with the specified level of risk tolerance;
  - the appropriateness of the limits, the adequacy of projections and the overall adequacy of the equity capital in relation to the level and the form of the risks taken.
- Approve the proposals of the competent units regarding the adoption of the appropriate risk mitigation techniques at acceptable levels.
- Provide, at least annually, for the transaction of stress tests on credit risk, liquidity risk, market risk, as well as operational risk, using the appropriate techniques.
- Review and evaluate risk management information periodic reports, including the loan portfolio quarterly analysis, and stress test results, produced by RMD.
- Review and evaluate the ICAAP and ILAAP results, and if necessary, suggest to the Board a revision of the business strategy.
- Conduct a self-assessment and report its conclusions and recommendations, verbally or in writing to the Board, for improvements and changes.
- Formulate propositions and propose corrective actions to the BoD for any identified riskrelated issues or weaknesses in carrying out the established strategy for the Bank's risk management or divergences regarding its implementation.
- Signing off the quality and integrity of risk-related data submitted to supervisory authorities including the CBC.
- Review and monitor risk tolerance levels by product, risk category and business line.
- Approve risk limits and tolerance levels where such authority is delegated by the BoD.
- Take any other necessary actions for carrying out effectively its mission.
- Advise the BoD, drawing on the work of the Audit Committee, Risk Management Department and external auditors, on the adequacy and effectiveness of the risk management framework.
- Ensure that risk parameters and risk models developed and used to quantify them are subject to periodic independent validation.
- Submit to the BoD recommendations for the appointment or removal of the Head of the Risk Management Department.

In addition, the RMC is responsible for monitoring the independence, adequacy and effectiveness of the Risk Management and Information Security Departments. During 2021, the RMC met six times.

#### 3.3.2 Audit Committee

The Audit Committee aims to assist the Board with respect to carrying out its supervisory responsibilities for issues that primarily concern:

- The Bank's Internal Controls System.
- The procedures for preparing the annual and interim financial reports.
- The external auditors / accountants.
- The Internal Audit Unit (IAU).
- The Compliance Unit (CU).
- The observance of the Bank's Code of Conduct.

As at 31 December 2021, the Audit Committee was made up of two Independent Non-Executive directors of the Board and it convened nine times during the year.

#### 3.3.3 Nomination and Remuneration Committee

As at 31 December 2021 the Nomination and Remuneration Committee comprised of a Non-Executive director (also the chairman) and two Independent Non-Executive directors. The Committee has a dual function by acting as a Nomination Committee for the replacement / succession of members of the Board, and as a Remuneration Committee. During 2021, the Nomination and Remuneration Committee held six meetings. More information on its role and duties can be found in section 11 of these disclosures.

#### 3.3.4 Board Credit Committee

The committee was dissolved on 01/01/2021. Any approvals of credit proposals above the materiality thresholds defined in the Risk Appetite Framework, are granted directly by the BoD.

#### 3.4 Recruitment policy for the selection of members of the Management Body

Appointment to the Bank's Board of Directors requires satisfying a set of criteria which include the candidates' academic and employment background, the adequacy and relevance of their knowledge and skills to the business and specificities of the Bank, their ethos and reputation, their personal and professional integrity, their experience and capabilities as well as their management skills. The Members of the Management Body are University graduates in Finance, Business Administration, Law, Economics, etc. and have collective international and/or local experience in international, corporate and retail banking. Some of the Members have professional qualification relating to financial matters and all share skills related to finance, corporate governance, legal, audit, finance, strategy, risk, etc.

#### 3.5 Diversity Policy for the selection of members of the Management Body

In order to encourage critical thinking and well-rounded opinions and decision-making, the Bank strives to achieve diversity in the composition of its Board, especially with regards to academic background, professional experience, skills and competencies, age, gender and ethnic/racial origin. In an effort to ensure that the under-represented gender has a minimum percentage representation in the Management Body, the Bank has set a target to increase the proportion of women to 30% by the end of 2023.

#### 3.6 Number of directorships held by members of the Board

The following table presents the number of directorships held at the same time in other entities (including the one held at the Bank) by each member of the Bank's Board of Directors. The directorships presented are those that are in effect in mid June 2022, for all directors who were

members of the BoD as at 31/12/2021. Directorships in organisations, which do not pursue predominantly commercial objectives, such as non-profit-making or charitable organizations, are not taken into account for the purposes of the below. In addition, the number of directorships disclosed below include companies belonging to the same group which, based on Article 91 of EU Directive 2013/36/EU ("CRDIV"), can be considered as a single directorship.

| Name of Director         | Position within the Bank | No. of Directorships |               |
|--------------------------|--------------------------|----------------------|---------------|
|                          |                          | Executive            | Non-Executive |
| Michalakis Sarris        | Chairman – Non-Executive | -                    | 3             |
| Maurice Nicolas Sehnaoui | Non-Executive Director   | 1                    | 1             |
| Aristidis Vourakis       | Executive Director       | 1                    | 1             |
| Bassam Najib Diab        | Non-Executive Director   | -                    | 1             |
| Andreas Vassiliou        | Non-Executive Director   | -                    | 1             |
| Maria Dionyssiades       | Non-Executive Director   | -                    | 2             |
| Costas Partassides       | Non-Executive Director   | 1                    | 3             |

#### 3.7 Information flow on risk to the Management Body

The information flow on risk to the Board is achieved, inter alia, through the following reports:

- Annual Report of the Compliance Department.
- Annual Report of the Anti-Money Laundering Compliance Officer and AML Risk Management Report.
- The ICAAP (Internal Capital Adequacy Assessment Process), ILAAP (Internal Liquidity Adequacy Assessment Process) and Recovery Plan.
- Annual Report of the Risk Management Department on Risk Management.
- Annual Report of the Information Security Department on the Security of Information.
- Annual Report of the Internal Audit Department on the adequacy and effectiveness of the Internal Audit Controls System.
- Annual Performance Self-Assessment Report of the governing body as a whole, its committees and individual members including assessment of the Chairman of the Board of Directors.
- Report every three years assessing the adequacy of the Internal Controls System on an individual and consolidated basis by External Auditors.
- Report every three years assessing the composition and operations of the management body and its committees prepared by External Consultants.
- Annual Financial Statements.
- Through updates by the Chairman of the RMC on the Quarterly Risk Management Report of the Risk Management Department provided to the RMC and Executive & Senior Management.
- The Bank's financial results prepared by the Finance Department.
- Through updates by the Chairman of the Audit Committee on the Quarterly Reports of Compliance and Internal Audit Departments to Audit Committee and Executive Management.

#### **3.8 Board Declaration - Adequacy of the Risk Management arrangements**

The Board of Directors is responsible for reviewing the effectiveness of the Bank's risk management arrangements, including, also the liquidity risk management arrangements and systems of financial and internal control. These are assigned to manage rather than eliminate the risks of not achieving

business objectives, and – as such – offer reasonable but not absolute assurance against fraud, material misstatement and loss.

The Executive Management and the Board of Directors consider that the Bank has in place adequate systems and controls with regards to the Bank's profile and strategy and an appropriate array of assurance mechanisms, properly resourced and skilled, to avoid or minimize loss.

#### 3.9 Risk Statement

The Bank aims to have sufficient liquidity and capital resources and maintain stable and recurring profitability. The risk appetite is determined so as not to exceed the risk capacity, given current business conditions, and ensure the Bank's operational smoothness, the achievement of its strategic objectives, as well as the achievement of satisfactory performance. In parallel, it aims to ensure that under adverse business and macroeconomic conditions (crisis scenarios), the risk capacity can be reasonably expected to absorb unexpected losses and/or commitments, safeguarding a minimum level of solvency as well as depositors' and shareholders' interests.

A summary of the Board's Risk Appetite Statement as at 31 December 2021 is provided in Annex II.

#### 3.10 Recovery Plan

The Bank's Recovery Plan (RP) is in line with the framework set out in the Bank Recovery and Resolution Directive ("BRRD") with reference to supporting Regulatory Technical Standards and Guidelines issued by the European Banking Authority ("EBA"). The RP, which is prepared on an annual basis, presents a set of carefully selected options available to the Bank in order to address hypothetical severe financial difficulties resulting from idiosyncratic vulnerabilities or market-wide issues or a combination of both. During 2021, the Bank updated the Recovery Plan based on the Bank's Business Plan approved by the BoD on 31 March 2021. The Bank's 2021 Recovery Plan was approved by the Board of Directors on 26 April 2021 and was submitted to the CBC.

#### 3.11 Internal Control Functions and other Departments

#### Risk Management Department

The role of the Risk Management Department (RMD) is to promote a risk management culture across the Bank, develop policies and supporting methodologies for identifying, assessing, and where possible mitigating the Bank's risk exposures, produce risk management information reporting that can be integrated to the Bank's decision making processes, and produce capital adequacy as well as other regulatory reports that fall under ECB's "Capital Requirements Regulation- CRR - Regulation (EU) 575/2013" and CBC's "Capital Requirements Directive – CRD" as amended by Regulation (EU) 2019/876 (CRR II) and Directive (EU) 2019/878 (CRD V). The roles and responsibilities of the Risk Management Department are in line with the CBC Internal Governance of Credit Institutions Directive of 2021.

The Head of the RMD reports through the Board Risk Committee, to the Board of Directors. The RMD is independent from any business activities and has access to all necessary information regarding the activities of all business lines, as well as to the information required to meet its obligations. Due to the small size of the Bank, the Information Security Department was also under the supervision of the Head of the RMD.

The Risk Management Department's overall mission is to:

- Ensure the appropriate implementation of risk management policies approved by the BoD, and where appropriate facilitate the business lines in doing so.
- Develop and implement methodologies for the identification, assessment/measurement and monitoring of risk exposures that arise from the Bank's operations.
- Propose internal limits for specific risk types and monitor their usage.
- Ensure regulatory compliance with EU and CBC-defined risk limits.
- Design risk reports and produce risk management information for the Executive Management, RMC and BoD.
- Recommend to the RMC appropriate techniques for restraining risks within acceptable levels of tolerance or mitigating these further.
- Calculate capital adequacy requirements by using appropriate methodologies under CRR/Regulation (EU) 575/2013 Pillar I as amended by Regulation (EU) 2019/876 (CRR II), produce CoRep (Common Reporting Templates), and ensure on-going regulatory compliance.
- Monitor the overall credit portfolio composition and recommend any corrective actions in avoiding concentration risk.
- Participate and consult in the new product evaluation process.
- Participate and consult in the development of risk-related internal procedures.
- Participate in the Provisioning Committee as a non-voting member and ensure the adequacy of the provisions of the Collective impairment exercise calculated by the RMD and Individual Impairment exercise calculated by Finance. Participate also in the ALCO without taking part in the business decision making, as well as in the IT Steering Committee.
- Undertake the evaluation of the Bank's Internal Capital Adequacy Assessment Process (Regulation (EU) 575/2013 CRR Pillar II) and document it in the ICAAP document.
- Undertake the evaluation of the Bank's Internal Liquidity Adequacy Assessment Process (Article 86 of Directive 2013/36/EU for "Liquidity Risk) and document it in the ILAAP document.
- Undertake the development of the Recovery Plan in line with the framework set out in the Bank Recovery and Resolution Directive ("BRRD") with reference to supporting Regulatory Technical Standards and Guidelines issued by EBA.
- Act as a liaison between the Bank and regulatory authorities with regard to matters related to CRD/CRR requirements.
- Monitor the risk exposures and determine the corresponding capital needs on an on-going basis.
- Use forward-looking tools such as scenario analysis and stress tests as part of risk identification and capital requirement calculation processes.

#### Internal Audit Department

The Internal Audit Department is an independent function, and reports to the Board through the Board's Audit Committee. The Internal Audit Department reviews and assesses inter alia the effectiveness and completeness of the Bank's risk management framework, as well as selected risk management processes including the capital and liquidity adequacy calculation process, ICAAP and ILAAP. The roles and responsibilities of the Internal Audit comply with the CBC Internal Governance of Credit Institutions Directive of 2021.

#### Compliance Department

The Compliance Department establishes and implements appropriate mechanisms and activities to promote a corporate culture of compliance and integrity within the Bank to ensure that the

compliance risk is being effectively managed. The policies and procedures among others mainly cover the areas of Money Laundering, Terrorism financing, acceptance of new clients, etc.

#### **Other Departments and Committees**

The other Departments and Committees actively engaged in the Bank's day-to-day risk management processes have clearly defined roles and responsibilities in risk-taking as well as managing risk. They operate under prudent banking practices and comply with the relevant regulatory requirements. In addition, effective internal controls through sound policies, procedures and processes are established to promote risk culture within the Bank and maintain the Bank's risk exposures within acceptable parameters. The Business Lines, Credit Division, and the various Approving Authorities (including the Credit Committees) operate within well-defined credit granting criteria and processes, which are in line with the Bank's policy and regulatory provisions.

#### 4. CAPITAL BASE

The Bank's regulatory capital as at 31 December 2021 is comprised of Common Equity Tier 1 (CET1) and Tier 2 (T2) items. CET1 items include ordinary share capital, share premium and reserves. The Bank deducts from its CET1 capital its intangible assets (computer software and other intangibles), its deferred tax assets that rely on future profitability and do not arise from temporary differences (if any), its Additional Valuation Adjustments (AVA) as per Article 34 of the CRR, its investments in subsidiaries and the accumulated property revaluation and related deferred tax concerning own use premises i.e mainly the Bank's Head Office Building, which is not readily available for immediate use and as such, does not qualify for inclusion in CET1.

The unsecured and subordinated Tier 2 Bond of €16m was issued during 2020. The Bond was priced at par with a coupon of 8% per annum, payable quarterly. The Bond matures ten years from the issuance date. The Bank may redeem all of the Bonds on any Interest Payment Date following the fifth anniversary of the issuance date of the relevant Bond, subject to applicable regulatory consents.

In December 2021, the Bank issued EUR1.200.000 and USD2.100.000 senior preferred bonds. The Bonds were priced at par with a coupon of 2,25% and 3,0% per annum respectively, payable annually. The Bonds mature two years from the issuance date. The Bank has the option to redeem the bonds early in December 2022, subject to applicable regulatory consents. The bonds comply with the criteria for the minimum requirement for own funds and eligible liabilities (MREL) and contribute towards the Bank's MREL requirements. The Bank plans to redeem these bonds in December 2022.

As at 31 December 2021, the Bank was subject to a minimum Overall Capital Requirement (OCR) of 13,60%, consisting of the Pillar I minimum 8%, the Pillar II Requirement of 2,85% plus the Capital Conservation Buffer of 2,50% and an O-SII buffer of 0,25% applicable starting from 1<sup>st</sup> of January 2020. The Institution-specific Countercyclical Capital Buffer was calculated at approximately 0% due to the fact that, as at 31 December 2021, the Bank's relevant exposures for the purposes of the said buffer were mainly towards counterparties in Hong Kong and Bulgaria, which have Countercyclical Capital Buffer rate of 1,00% and 0,5% respectively and the exposures were insignificant.

#### **SREP Process - Prudential requirements**

The CBC's decision applicable from 1<sup>st</sup> January 2019, requires the Bank to maintain an OCR of 13,60% (including the O-SII buffer of 0,25% as from 1 January 2020) and to hold capital to meet a Total SREP Capital Requirements (TSCR) of 10,85% of the total risk exposure amount to be met at all times. The **OCR of 13,60%** includes the following elements:

- A TSCR (Total SREP Capital Requirement) of 10,85% which includes:
  - **8% minimum own funds requirement** to be maintained at all times in accordance with Article 92(1) of Regulation (EU) No 575/2013 (Pillar I) and
  - 2,85% additional own funds requirement. The CBC on 23/12/2020 advised the Bank that the SREP decision remains in force but the composition of the Pillar 2 own funds requirements due to Covid-19 is amended in line with the CRR2. Basically, the ECB advanced the application of the amended article 104/a of CRD that allows banks to meet their Pillar II requirements using the same capital structure as for their Pillar I requirements (i.e., 56,25% CET1, 18,75% Additional Tier 1 (or 75% Tier1 Capital = 56,25%+18,75%) and up to 25% Tier 2). Based on this relaxation the Bank's Minimum CET1 to be held in excess of the minimum own funds stands at 8,85% (excluding the Pillar 2 Guidance (P2G)).
- The combined buffer requirement as defined in Article 128(6) of the Directive 2013/36/EU, to the extent it is legally applicable. Based on this, banks are required to hold additional buffers to withstand future stress. The combined buffer requirement consists of:
  - Capital Conservation Buffer: 2,5% as of 1 January 2019 (to be made entirely of CET1)
  - Institution-specific Countercyclical Capital Buffer: Calculated as 0% by the Bank
  - Systemic Risk Buffer: 0%
  - the Other Systemically Important Institution (O-SII) buffer of 0,25%. The CBC informed the Bank on 11 October 2019 of an increase in regulatory capital requirements by 0.25% as from 1.1.2020 representing the Other Systemically Important Institutions (O-SII) buffer, which was going to be phased-in until 1/1/2022 as follows: 0,25% 1/1/2020, 0,375% on 1/1/2021 and 0,50% 1/1/2022. The O-SII shall be made entirely of CET1. Following the Covid-19 relaxations, the CBC on 7 May 2020 deferred the phasing-in schedule by 12 months until 1/1/2023, however, on 29 November 2021, the CBC notified the Bank that based on new calculations the O-SII buffer for the Bank will remain 0,25% throughout the period of 2021 2023.

The Bank's Capital Adequacy Ratios as at 31 December 2021 were as follows:

| ٠ | Common Equity Tier 1 ratio | : | 15,31% |
|---|----------------------------|---|--------|
| ٠ | Tier 1 ratio               | : | 15,31% |
| ٠ | Capital Adequacy Ratio     | : | 16,58% |

During 2021, the Bank was in compliance with the minimum OCR. The Bank's ratio as at 31 December 2021 was positively affected due to the decrease in investments with capital consumption, the organic improvement in capital base through profitability and the optimisation of RWAs (i.e. the Bank's operating model emphasizes on new loans with lower capital consumptions and on NPE resolution etc). Moreover, the ratio was also positively affected mainly by the ECB supervisory reliefs due to

the Covid-19 pandemic (i.e. the add back of the increased Expected Credit Loss for new loans etc) which continued to apply in 2021. It is also noted that the Bank's capital adequacy ratio was negatively affected mainly by the phasing-in of IFRS 9 Transitional adjustments on 1 January 2021 (which for the loans prior to Covid-19 decreased from 70% to 50%. As at 31 December 2021 the Bank's Capital Adequacy Ratio stood at 16,58% which is above the minimum OCR of 13,60% and above the OCR including P2G.

#### Share Capital

As at 31 December 2021, there were €23.6 million (2020: €23.6 million) issued ordinary shares with a nominal value of €1 each. There were no changes to the issued share capital during the year ended 31 December 2021.

#### 4.1 Composition of regulatory own funds

The tables below disclose the components of regulatory capital as at 31 December 2021 and 2020. The disclosures have been prepared using the format set out in Annex VII of the Commission Implementing Regulation (EU) 2021/637 laying down implementing technical standards (ITS) with regards to the disclosure of own funds requirements for institutions, as per Article 437 of the CRR.

## Template 1: EU CC1 - Composition of regulatory own funds

|       |   | (a)                    | (a)                 | (b)   |

#### *Composition of regulatory own funds – commentary*

*The increase of 147 basis points in CET1 ratio (IFRS9 transitional basis) compared to 31 December 2020 was mainly the result of the following:* 

- 1) Net Increase in CET1 Capital mainly due to:
  - a. the current year's profit,
  - b. the reduction of the intangible assets which are deducted from the own funds,
- 2) Net Decrease in the Credit RWAs mainly due to:
  - a. the decrease of investments with capital consumption,
  - b. the repayment of funded exposures and
  - c. new loans with lower capital consumption as a result of eligible collateral

1 \*References provide the mapping of items of the statement of financial position prepared under the regulatory scope of consolidation used to calculate regulatory capital as reflected in column "References" in Section 4.2 "EU CC1 - Composition of regulatory own funds"

The Pillar III disclosures may be different than the disclosures presented in the Consolidated Financial Statements of the Bank and its Subsidiaries for the year ending 31 December 2021 and 2020, which are prepared in accordance with the International Financial Reporting Standards (IFRSs). This is mainly due to differences between the prudential solo basis and the accounting consolidation basis used by the Group and the differences in definitions used under the scope of the Pillar III Disclosures.

The Bank's published audited financial statements are those of the Group on consolidation basis i.e. including the Bank's investment property subsidiary companies which mainly manage and administer the properties acquired by the Bank in debt satisfaction. In the Pillar I calculation these properties are treated as stock of property reflecting the substance of these transactions, and the Bank.

#### 4.3 Countercyclical Capital Buffer

In accordance with Article 130(1) of the CRDIV Directive. institutions are required to maintain an Institution-specific Countercyclical Capital Buffer. In relation to this buffer, the European Commission's Delegated Regulation (EU) 2015/1555 further requires institutions to disclose the key elements of the calculation of their Countercyclical Capital Buffer, in order to ensure transparency and comparability across institutions in the EU. In this respect, the table below provides information on the geographical distribution of credit exposures relevant for the calculation of the Bank's Countercyclical Capital Buffer as at 31 December 2021. Exposures to foreign countries which did not exceed 10% of the total exposure (before Credit Conversion factor CCF) are included under the "Other" category.

#### 4.4 PV1 - Prudent valuation adjustments (PVA)

.

The Bank follows the simplified approach as per Chapter II of the Delegated Regulation (EU) 2016/101 on prudent valuation. As disclosed in Section 4, pursuant to Article 34 of the CRR, the prudent valuation requirements of Article 105 of the CRR are applied to all assets and liabilities measured at fair value which relate to financial instruments and are deducted from CET 1 capital. The corresponding figure for 31 December 2021 is €23 thousand (31 December 2020: €23 thousand) and therefore due to materiality "Template EU PV1 - Prudent valuation adjustments (PVA)" is not disclosed.

#### 4.5 Minimum requirement for own funds and eligible liabilities

The Bank, within the framework of the Bank Recovery and Resolution Directive (BRRD), is subject to the minimum requirement for own funds and eligible liabilities (MREL). The framework, which entered into effect on 1 January 2016, provides authorities with a credible set of tools to intervene sufficiently early and quickly in an unsound or failing institution so as to ensure the continuity of the Bank's critical financial and economic functions, while minimising the impact of an institution's failure on the economy and financial system. This is achieved by requiring banks to have a funding structure with a certain proportion of liabilities that can be written off or converted into equity in the event of a bank failure. Such liabilities, in combination with equity, are known as MREL. In June 2019, as part of the reform package for strengthening the resilience and resolvability of European banks, the BRRD II came into effect and it has recently being transposed into National Law. Further to the above, certain provisions on MREL have been introduced in CRR II, which also came into force in June 2019, as part of the reform package and took immediate effect. The Bank has received a formal notification (the Decision) from the CBC on 11 April 2022, of its final decision for the binding minimum requirement for own funds and eligible liabilities (MREL) for the Bank.

Accordingly, the minimum MREL requirement for the Bank is set at 20,47% of Total Risk Exposure Amount (TREA) and 5,31% of leverage ratio exposure (LRE) and this must be met by 31st December 2025. Furthermore, the Bank must comply with an intermediate requirement of 12,57% of TREAs and 5,31% of LRE as from 1st January 2022. The own funds used by the Bank to meet the combined buffer requirement (CBR) will not be eligible to meet its MREL requirements expressed in terms of TREAs. To meet its MREL requirement by 31<sup>st</sup> December 2025, the Bank is considering to establish a 5 year issuance program of up to a €0,25 billion size.

The MREL requirement for the final target to be met by 31 December 2025 is expected to change over time due to: (a) possible changes in regulatory capital requirements and/or (b) changes in the financial position of the Bank (such as changes in RWAs, own funds, non-performing exposures). The Bank anticipates that the MREL requirement will be assessed and set on an ongoing basis.

\* Due to an oversight the leverage ratio recorded in the audited financial statements for the same reference period represents the before audit calculation which stood at 6,01% instead of the after audit which stood at 6,26%.

#### *Composition of regulatory own funds – commentary*

*The increase of 147 basis points in CET1 ratio (IFRS9 transitional basis) compared to 31 December 2020 was mainly the result of the following:* 

- 1) Net Increase in CET1 Capital mainly due to:
  - a. the current year's profit,
  - b. the reduction of the intangible assets which are deducted from the own funds,
- 2) Net Decrease in Credit RWAs mainly due to:
  - a. the decrease of investments with capital consumption,
  - b. the repayment of funded exposures and
  - c. new loans with lower capital consumption as a result of eligible collateral

#### 5. CAPITAL REQUIREMENTS

The Bank follows the Standardised Approach (STA) for the calculation of the Pillar I capital requirement for credit risk and market risk and the Basic Indicator Approach (BIA) for operational risk. Pillar II requirement (P2R) is a bank-specific capital requirement which applies in addition to, and covers risks

which might be underestimated or not covered by Pillar I. The Pillar II requirement is determined on the basis of SREP.

A comparison of Pillar I capital requirement (defined on Pillar I total capital at 8%) between 2021 and 2020 is provided in the table below.

## 6. CREDIT RISK

## 6.1 Definition of Credit Risk

In the ordinary course of its business the Bank is exposed to Credit Risk, which is monitored through various control mechanisms. Credit Risk is the risk of financial loss to the Bank if a customer and/or other counterparty to a financial instrument fail to meet their contractual obligations and arises primarily from the Bank's loans and advances to customers and investment in debt securities.

## 6.2 Credit Risk Management Framework

The Bank's Credit Risk management framework focus on ensuring a disciplined risk culture, transparency and rational risk-taking, based on international common practices. Credit Risk management methodologies are modified to reflect the changing financial environment.

The various Credit Risk assessment methods used are in line with the Bank's credit policy and procedures and revised annually or whenever deemed necessary and are adjusted according to the Bank's overall strategy and short-term and long-term objectives. The various analyses of economic sectors and sub-sectors, combined with economic forecasts, provide the guidelines for the determination of the credit policy, which is revised from time to time.

## 6.2.1 Measurement of Credit Risk and adoption of credit limits

Having as target the minimization of Credit Risk, the Bank takes into consideration the assigned collaterals and guarantees that reduce its exposure to Credit Risk, as well as the nature and duration of the credit facility. The Bank has also set concentration Credit Risk limits by taking into consideration the country's risk but also the economic sector in which it operates, as well as qualitative and quantitative characteristics.

At the same time, limits have been established for the approval of credit facilities and lending procedures that provide for the segregation of duties, in order to ensure the objectivity, independence and monitoring of new and existing loans.

During the approval process the total Credit Risk is examined for each counterparty or group of counterparties which are related at Bank level. At the same time, any concentration is analysed and monitored on a continuous basis, with an aim to restrict potential large openings and dangerous concentrations, so that these will be in line with the existing credit policy limits. Concentration of Credit Risk can arise at the level of an economic sector, a counterparty or group of counterparties, country, currency and or nature of collateral.

Past due advances are monitored on a continuous basis and a systematic segregation between performing and non-performing advances is carried out according to the internal policy of the Bank, which takes into account the criteria of the CBC directive, the ECB Regulations and the EBA Guidelines. Significant exposures or delays are communicated to the Management which oversees the corresponding department for taking preventive or corrective measures.

Under the Risk management framework, there is an evaluation of the effects of extreme but feasible scenarios on the quality of the loan portfolio and to the available capital, through simulation of crisis conditions (stress testing). The simulations examine each business and individual portfolio and estimate possible increases of unsecured advances which are likely to arise due to future decreases in collateral values. The unsecured exposures are calculated based on values after the application of haircuts as defined by the Credit Policy.

# 6.3 Standardised Approach for Credit risk

The minimum capital requirements for Credit Risk are calculated on the level of the exposure using a factor of 8% as defined by the CRR. The following table shows the Risk Weighted Assets and the corresponding minimum capital requirements as at 31 December 2021 and 31 December 2020, for each of the exposure classes, based on the Standardised Approach:

|  | Risk<br>Weighted<br>Assets<br>31.12.2021 | Minimum<br>Capital<br>Requirements<br>31.12.2021 | Risk<br>Weighted<br>Assets<br>1.12.2020 | Minimum<br>Capital<br>Requirements<br>31.12.2020 |
|--|--|--|---|--|

# 6.4 Credit Risk Mitigation

The Bank implements various policies and methods, in order to achieve effective mitigation of Credit Risk, of which the most important are listed below:

# 6.4.1 Credit Risk Policy

The degree of risk associated with any credit exposure depends on many factors, including general conditions of the economy and the market, the financial position of borrowers, the amount, type and duration of exposure and the existence of collateral and guarantees. The Bank has established policies and procedures as part of the overall Credit Risk management framework. At minimum, the existing policies and procedures provide guidance to the staff on the credit evaluation/appraisal process, credit approval authorities, loan administration and documentation, roles and responsibilities of staff in the various functions of credit, the various types of tangible and non-tangible collaterals that are acceptable by the Bank for granting credit facilities, the management of problematic loans and procedures for early remedial action.

Further to the establishment of credit policies and procedures, which ensure that the credit granting activities are conducted in a safe and sound manner, in order to minimize Credit Risk, an integrated Credit Risk management information reporting framework is applied to closely monitor and manage portfolio Credit and Counterparty risk as well as Credit Risk concentrations.

## 6.4.2 Collaterals and securities

The Bank receives collaterals and/or securities for customers' loans, reducing the overall Credit Risk and ensuring the timely repayment of claims. For this purpose, it has identified and incorporated in its credit policy, eligible categories of collaterals and securities, the main ones of which are the following: Pledge on deposits, Bank letters of guarantee, Government Guarantees, Real Estate mortgages, Pledge on shares, Bonds or Treasury Bills, Stocks, Corporate and Personal guarantees, etc.

The evaluation of related collaterals and/ or securities takes place, initially at the time of the approval of the loan based on their current or fair value, and they are re-evaluated at regular intervals. The collateral coverage of the customer loan portfolio is monitored and reported on a regular basis, however, the Bank expects to enhance this reporting further with the new collateral module to be implemented in 2023.

## 6.4.3 Loan commitments

The Bank makes loan commitments to customers. ensuring their future financing as and when required. Loan commitments involve the same Credit Risk as loans and claims of the Bank and mainly concern letters of credit and letters of guarantee. The remaining tenor of loan commitments is analyzed and systematically monitored, as in general, loan commitments with longer tenors pose a greater risk than those with shorter tenors.

## 6.4.4 Credit Risk limits

The monitoring of Counterparty Credit Risk is a key part of risk management. The Bank controls and mitigates the amount and concentration of Credit Risk by applying the credit limits for 'Large Exposures to Customers and their Connected Persons' as determined by the CRR and by setting also internal limits. These are monitored on a quarterly basis. The Bank has also set up Counterparty credit limits for sovereign and financial institutions which are mainly grade driven (i.e. investment grade, non-investment grade/non-rated). The Bank has set up internal limits for monitoring the customer loan portfolio sector concentration. These are updated from time to time based on the Bank's risk appetite and macro-economic factor changes.

#### Internal rating systems

The methods for evaluation of credit rating differ depending on the type of counterparty in the following categories: central governments (purchase and holding of bonds), financial institutions, large corporates and SMEs and individuals. Individuals are evaluated based on two different methods of internal rating. The first method relates to existing customers and is based on the customers' repayment history and their general cooperation with the Bank, while the second method, which is applied to both existing and new customers, is based both on demographic factors and objective financial data (e.g. income. assets etc.). For the evaluation of large corporate and SMEs, the system used is the Credit Lens of Moody's (MRA), which evaluates the financial condition of the business based on its economic and qualitative data, but also based on the economic sector it operates in. The evaluation process is performed on a regular basis, usually upon review, or when conditions require it so that the customer' s credit rating is representative of the Credit Risk being undertaken and functions as a risk warning signal.

The customer's credit rating is used during the process of approving credit facilities and the setting of respective credit limits, for internal calculations of the probability of default as well as for monitoring changes in the quality of the loan portfolio of the Bank, with the aim to develop the appropriate strategies for avoiding undertaking increased risks.

#### 6.4.5 Use of External Credit Assessments Institutions' (ECAI) ratings

The Bank uses external credit ratings from Fitch, Moody's and Standard & Poor's for the purpose of determining the risk weight of the relevant Credit Risk exposures, in line with article 138 of CRR. In the cases where the three credit ratings available for a specific exposure differ, the Bank takes the two credit ratings that generate the lowest risk weights, and then uses the worst out of the two (i.e. the one generating the highest risk weight). The Bank uses the issue-specific credit rating when available and only in the absence of such a rating it reverts to the issuer/counterparty credit assessment.

| Credit Quality Step | Fitch          | Moody's        | S&Ps           |
|---------------------|----------------|----------------|----------------|
| 1                   | AAA to AA-     | Aaa to Aa3     | AAA to AA-     |
| 2                   | A+ to A-       | A1 to A3       | A+ to A-       |
| 3                   | BBB+ to BBB-   | Baa1 to Baa3   | BBB+ to BBB-   |
| 4                   | BB+ to BB-     | Ba1 to Ba3     | BB+ to BB-     |
| 5                   | B+ to B-       | B1 to B3       | B+ to B-       |
| 6                   | CCC+ and below | Caa1 and below | CCC+ and below |

#### Credit ratings are mapped into Credit Quality Steps ranging from 1 to 6, as per the table below:

#### 6.4.6 Management of Credit Risk and CRM effects

The Bank obtains collaterals so as to better manage the Credit Risk that arises from loans and advances. The main types of collaterals that the Bank obtains are:

- Mortgages (Commercial. Residential and other)
- Government and bank guarantees
- Deposits
- Pledging of shares and bonds
- Other encumbrances and
- Personal and corporate guarantees.

As at 31 December 2021 the unfunded credit protection recognized by the Bank consisted mainly of Cyprus government guarantees which received 0% risk weight. The fair value of collaterals is determined using generally accepted valuation techniques, which include market price comparisons. Valuations are performed by independent third-party valuation professionals and the fair values are updated using official, published property price indices.

The Bank has robust procedures and processes to control any risk arising from the use of collaterals and from the interaction with its overall risk profile, including the risk of disruption or reduction of credit protection, valuations and collateral risk, the risk of termination of the credit protection and concentration risk.

Includes all customer loans. both on- and off-balance sheet. Excludes spot deals and derivatives.

\*\* Includes mortgages on immovable property, cash, equities.

\*\* Unfunded protection (i.e. guarantee).

Commentary: The overall decrease in Exposures (unsecured) was mainly driven due to the repayment of loans and the overall increase in Exposures (secured) was mainly driven by lending growth for which the collateral received was eligible under the CRM techniques of CRR purposes.

#### 6.5 Risk of impairment

#### <u>Past due items</u>

Past due loans are those accounts with arrears or in excess of authorized credit limits (exceeding the regulatory materiality thresholds over 90 consecutive days) and exposures that are at the Debt Servicing Company.

All customer exposures that are not individually assessed, are assessed on a collective basis. For the purposes of calculating ECL, exposures are grouped into granular portfolios/ segments with shared risk characteristics. The granularity is based on different levels of segmentation which, among other factors include customer type, exposure class and portfolio type.

The Bank applies the IFRS 9 for the Bank's accounting for impairment losses for financial assets, which is a forward looking "expected credit loss model". This requires considerable judgement over how changes in economic factors affect expected credit losses (ECLs), which is determined on a probability-weighted basis.

The impairment model applies to the following financial instruments that are not measured at FVTPL:

- financial assets that are measured at amortised cost or FVOCI;
- lease receivables;
- financial guarantee contracts issued; and
- loan commitments issued.

At initial recognition, impairment allowance (or provision in the case of commitments and guarantees) is required for ECL resulting from default events that are possible within the next 12 months (12-month ECL), unless assets are deemed as POCI. In the event of a significant increase in credit risk since initial recognition, impairment allowance is required resulting from all possible default events over the expected life of the financial instrument (lifetime ECL).

The Bank categorises its financial assets into Stage 1, Stage 2, Stage 3 and POCI for ECL measurement as described below:

- **Stage 1:** Financial assets which have not had a significant increase in Credit Risk since initial recognition are considered to be Stage 1 and 12-month ECL is recognised.
- **Stage 2:** Financial assets that are considered to have experienced a significant increase in Credit Risk since initial recognition are considered to be Stage 2 and lifetime losses are recognised.
- **Stage 3:** Financial assets which are considered to be credit-impaired (refer to Note 2 of the Bank's audited Financial Statements for financial year 2021 on how the Bank defines credit-impaired and default) and lifetime losses are recognised.
- **POCI:** Purchased or originated financial assets are financial assets that are credit-impaired on initial recognition. POCI assets include loans purchased or originated at a deep discount that reflect incurred credit losses. The Bank only recognizes the cumulative changes in lifetime ECLs since initial recognition.

The Bank calculates 12-month ECLs and lifetime ECLs either on an individual basis or on a collective basis. The individual assessment is performed for individually significant Stage 3 assets. A risk-based approach is used on the selection criteria of the individually assessed population NPE or forborne NPE exposures above a certain amount. The ECL is calculated on an individually assessed basis and all relevant considerations of the expected future cash flows are taken into account (i.e. the realisable value of the collateral, the business prospects of the customer).

All customer exposures that are not individually assessed, are assessed on a collective basis. For the purposes of calculating ECL, exposures are grouped into granular portfolios/ segments with shared risk characteristics. The granularity is based on different levels of segmentation which, among other factors include customer type, industry sector, exposure class and portfolio type.

## Key impairment concepts

## 1. Significant Credit Risk increase for loans and advances to customers

The Bank uses staging criteria to determine whether the Credit Risk on a particular financial instrument has increased significantly since initial recognition. The criteria for determining whether Credit Risk has increased significantly include delinquency and forbearance measures and are in line with Stage 2 criteria as follows:

- Days in Arrears: Exposures with more than 30 days in arrears
- Forbearance flag: A performing account with an active forbearance flag in line with the European Banking Authority (EBA) definition
- Facilities with at least two instances of 30 days past due in the last 12 months
- Facilities with at least one recent instance of forbearance in the last 12 months
- Facilities with higher than a specific internal credit rating level as developed by the Bank for assessing the credit quality of the customers
- For legal entities: Deterioration by 3 notches or more in the customers' rating compared to the latest of a) customers' rating at the inception of the loan or b) 1 January 2018 rating and the final rating is greater than a specific level based on the internal credit rating of the Bank.
- The probation period for transferring exposures from Stage 3 to Stage 1 is two quarters. During the probation period the exposures are classified as Stage 2.

## 2. Significant Credit Risk increase for financial instruments other than loans and advances to customers

Low credit risk simplification is adopted for debt security instruments, loans and advances to banks and balances with central banks with external credit ratings that are rated as investment grade. For debt security instruments and balances with Central banks and placements with other banks with external credit ratings that are rated as investment grade, the assessment of low credit risk is based on the external credit rating. For debt securities and balances with Central banks and placements with other banks which are below investment grade, the low credit risk simplification does not apply and therefore an assessment of significant credit deterioration takes place, by comparing their credit rating at origination with the credit rating on the reporting date. Significant deterioration in credit risk is considered to have occurred when the rating of the exposures drops to such an extent that the new rating relates to a riskier category (i.e. from a non-investment grade to speculative and then to highly speculative).

All financial assets are transferred out of Stage 2 into Stage 1, if their credit risk is no longer considered to be significantly increased since initial recognition based on the assessments described above.

## 3. Credit impaired and definition of default

The Bank considers loans and advances to customers that meet the non-performing exposure (NPE) definition as per the EBA standards to be in default and hence Stage 3 (credit-impaired). Therefore, such loans have ECL calculated on a lifetime basis and are considered to be in default for credit risk management purposes.

As per the EBA standards and European Central Bank's (ECB) Guidance to Banks on Non-Performing Loans (which was published in March 2017), NPEs are defined as those exposures that satisfy one of the following conditions:

- (i) The borrower is assessed as unlikely to pay its credit obligations in full without the realisation of the collateral, regardless of the existence of any past due amount or of the number of days past due.
- (ii) Defaulted or impaired exposures as per the approach provided in the Capital Requirement Regulation (CRR), which would also trigger a default under specific credit adjustment, distress restructuring and obligor bankruptcy.
- (iii) Material exposures as set by the Central Bank of Cyprus (CBC) and the Regulatory Technical Standards on the materiality threshold for past due credit obligations (EBA/RTS/2016/06, which are more than 90 consecutive days past due.
- (iv) Performing forborne exposures under probation for which additional forbearance measures are extended.
- (v) Performing forborne exposures under probation that present more than 30 days past due within the probation period and were initially (at restructuring) classified as NPE.

When a specific part of the exposures of a customer that fulfils the NPE criteria set out above is greater than 20% of the gross carrying amount of all on balance sheet exposures of that customer, then the total customer exposure is classified as non-performing; otherwise only the problematic part of the exposure is classified as non-performing.

Exposures cease to be considered as NPEs and in such case are transferred out of Stage 3, only when all of the following conditions are met:

- The extension of forbearance measures does not lead to the recognition of impairment or default.
- One year has passed since the forbearance measures were extended. In case of grace period loans, the exposure can exit the NPE status one year after the end of the grace period.
- Following the forbearance measures and according to the post-forbearance conditions, there is no past due amount or concerns regarding the full repayment of the exposure.
- No unlikely-to-pay criteria exist for the debtor.

• The debtor has made post-forbearance payments of a not-insignificant amount of capital (different capital thresholds apply according to the restructuring type).

#### New default definition effective from 1 January 2021

As of 1 January 2021, the Bank has implemented the new default definition under Article 178 of the Capital Requirements Directive as per the new EBA Guidelines (EBA/GL/2016/07) and the Regulatory Technical Standards on the materiality threshold for past due credit obligations (EBA/RTS/2016/06). Based on the new EBA guidelines the following apply:

- A new counter for the days past due "DPD" based on new regulatory materiality thresholds is introduced whenever these thresholds are breached for more than 90 consecutive days. The counter stops counting days past due only when the arrears/excesses are reduced below the materiality thresholds.
- If a material forgiveness or postponement of principal, interest or fees results in a diminished financial obligation that exceeds the materiality threshold as defined in the relevant EBA/GL/2016/07 then the "Unlikeliness to Pay" criterion is triggered regardless of the days past due, resulting in a non-performing forborne classification.
- All non-performing exposures are subject to a three month probation period whereby, no default entry criteria are met. Once the probation period ends, exposures are re-classified to performing with the exception of non-performing forborne that continue to undergo a minimum of twelve month probation period."

As at 1 January 2021, the impact of this change on the Bank was not significant for either the default balances or expected credit losses.

Debt securities, placements with other banks and balances with central banks are considered defaulted and transferred to Stage 3 if the issuers have failed to pay either interest or principal.

#### 4. Scenarios and forward-looking inputs

The Bank uses reasonable and supportable information, including forward-looking information, in the calculation of ECLs. ECLs are the unbiased probability-weighted credit losses determined by evaluating a range of possible outcomes and considering future economic conditions. ECLs are calculated for three macroeconomic scenarios, baseline, pessimistic and optimistic and the output is the weighted average ECL based on the assigned probability of each scenario.

Macroeconomic scenarios impact both the probability of default (PD) and the loss given default (LGD). Specifically, forward looking information is embedded in the PDs based on regression equations derived on the basis of historical data. Forward looking information embedded in the PDs relates to GDP growth, unemployment rates, industrial production, commercial price indices and residential price indices. This process involves consideration of external actual and forecast information provided by the Central Bank of Cyprus. Moody's Analytics and other providers of macroeconomic forecasts.

In regards to the LGD, the forward looking information is incorporated via the property indices for the types of properties (residential and commercial).

Predicted relationships between the key indicators and default and loss rates on the portfolios of financial assets have been developed based on an analysis of historical data.

Qualitative adjustments or overlays are occasionally made when inputs calculated do not capture all the characteristics of the market at the reporting date.

#### 5. Inputs into measurement of ECLs

The key inputs into the measurement of ECLs are the term structures of the following variables which are derived from statistical models and other historical data:

#### a. Probability of Default (PD)

PD represents the probability an exposure has to default and is calculated based on statistical models using a combination of Division, industry, customer type and product type criteria and taking into consideration the Bank's historical default rates and forward-looking information based on macroeconomic inputs. For the purposes of the PD estimation the Bank uses the EBA definition of NPE as its definition of default. As a result, the Bank has applied a methodology that suits the Bank's portfolio. complexity and data availability.

The Bank's IFRS 9 PD estimation approach consists of the following key steps:

- Step 1: Use historic default rates to estimate the Through The Cycle ("TTC") probabilities of default;
- Step 2: Establish a model linking the default rates to macroeconomic variables thus, mapping external market dynamics onto the Bank's internal credit risk parameters. i.e. to fit a distribution function to the observed cumulative default rates using a transformation of the Weibull distribution;
- Step 3: Obtain the point in time (PIT) PDs by adjusting the TTC conditional PD profile from step 1 using the forecasted default rate established in step 2 for years 1-3 and forecasted for the default rates based on appropriate long term assumptions with regards to economic activity.

PDs are estimated on a number of observation basis in light of the limited number of observations. For Legal Entities the PDs are estimated at a debtor level and at a facility level for all other segments.

#### b. Loss Given Default (LGD)

LGD represents an estimate of the loss if default occurs at a given time. It is usually expressed as a percentage of the EAD. It takes into account parameters such as the collateral value which is discounted to the present value determining the amount of the expected shortfall.

The structure of the LGD model considers:

- Curing where the probability of cure model was derived based on historical observations.
- Non-curing including cash recovery or realisation of collaterals either voluntarily, i.e. debt for asset swap, or through forced sale, auctions and foreclosure and receivership.

#### c. Exposure At Default (EAD)

EAD represents the expected exposure in the event of a default during the life of a financial instrument. The EAD methodology is differentiated in the following categories: Revolving and Non-Revolving exposures. In case of Revolving exposures all future EAD changes are recognised by a credit conversion factor parameter. The credit conversion factor model is derived based on historical data

from the last 6 years. For Non-Revolving exposures the term is based on the contractual term of the exposure and both on-balance sheet and off-balance sheet exposures are amortised in accordance with the principal contractual payment schedule of each exposure. In regards to the credit-impaired exposures, the EAD is equal to the on-balance sheet amount as at the reporting date. ECL is discounted at the effective interest rate at initial recognition or an approximation thereof.

#### 6. ECL measurement period

The period for which lifetime losses are determined is based on the contractual life of a financial instrument. For revolving loans, the period for which lifetime losses are determined is set at 12 months representing the next review date of the facility, at which the Bank has the right to limit or to cancel the exposure. For irrevocable loan commitments and financial guarantee contracts, the measurement period is determined similarly to the period of the revolving facilities.

The tables related to the loans and advances were completed on a best effort basis. The tables below disclose the net exposure value by residual maturities of loans and advances and dept securities as at 31 December 2021 and 2020 respectively.

## 6.6 Exposures to Counterparty Credit Risk (CCR) and Credit Valuation Adjustment (CVA)

Risk Article 432 of CRR provides that Institutions have the right to omit one or more disclosure requirements if the information provided by such disclosures is not regarded as material. Information in disclosures shall be regarded as material if its omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions.

Pursuant to EBA Guidelines on materiality, proprietary and confidentiality and on disclosure frequency under Articles 432(1), 432(2) and 433 of CRR, it was decided that the disclosure requirements of Article 439 of CRR and information relating to Credit Valuation Adjustment Risk (CVA Risk) be omitted from Pillar III disclosures since the information provided under this Article is not regarded as material for the Bank, as per the provisions of the said guidelines.

The information requirements of Article 439 relate to Derivative Exposures while the information on CVA risk relates specifically to Over-The-Counter Derivative Exposures of the Bank. This information has been assessed as non- material based on:

- Business model of the Bank and its long-term strategy to which derivative positions are assessed as non-relevant.
- The size of the derivative exposures both in terms of gross exposure (0,16% of total exposure) and in terms of Risk Weighted Asset Base (0,7% of Total RWA).
- Impact on the overall risk profile of the institution which is deemed as negligible based on the amount and nature of the exposure.

The materiality of the disclosure requirements included in Article 439 and information related to CVA Risk will be re-assessed each year.

## Information on loans and advances subject to legislative and non-legislative moratoria

Following the expiration of the first moratorium on 31 December 2020, a second moratorium for the suspension of instalments of capital and interest was introduced by the Cyprus Government in January 2021 until 30 June 2021 for customers impacted by the second lockdown, subject to certain criteria. The table provides an overview of the credit quality of loans and advances subject to legislative and non-legislative moratoria as at 31 December 2020 as following the expiration of both moratoria on 31 December 2020 and 30 June 2021 respectively, no further legislative moratoria have been introduced which explains the reason for reporting NIL figures as at 31 December 2021. The type of eligible moratorium granted was the suspension of instalments of capital and interest for a period of nine months. Moratorium was applied to all eligible individuals or legal entities across different sectors.

## 6.7 Internal Capital Adequacy Assessment Process

The Bank's Pillar II capital assessment relies largely on the Pillar I Plus approach under which Pillar I capital requirements serve as a starting point and thereafter an assessment is conducted to investigate the possibility of whether an additional capital cushion should be set aside for:

- (a) Pillar I risks (namely, credit and counterparty risk, operational risk, market risk) that may not be adequately covered by the regulatory capital requirements calculated under the Standardised Approach, and
- (b) Pillar II risks that lie beyond the scope of the regulatory capital requirements calculated under PillarI. Such risks typically include future non-performing loans (NPLs) from customer lending and their

impact on projected earnings, concentration risk, interest rate risk, liquidity risk and business risk. Through the ICAAP Stress Test process the risks are assessed on a forward-looking assessment in adverse conditions.

Pillar II capital is allocated to those risks where capital can actually serve as an effective cushion against future possible losses. No Pillar II capital is allocated under ICAAP for risks that capital cannot realistically absorb future possible losses, including catastrophic risks. Stress Testing is a key risk management tool to ensure that the Bank's financial position and risk profile provide sufficient resilience to withstand the impact of adverse economic stress. The stress testing program may include Sensitivity analysis and reverse Stress Testing that explore scenarios that might cause the Bank's capital or liquidity position to fall below the minimum regulatory requirements.

The Bank prepares the ICAAP report annually. The report for 2021 was approved by the Board of Directors and was submitted to the CBC on 2 July 2022. The ICAAP process demonstrates that the Bank has sufficient capital under both the base case and stress scenarios.

The Board signs a capital adequacy statement on an annual basis as part of the ICAAP.

# 7. MARKET AND LIQUIDITY RISK

# 7.1 Definition of Market & Liquidity Risk

Liquidity Risk is the risk that the Bank cannot generate or source sufficient liquid funds, in order to meet its immediate liabilities, without incurring significant economic costs.

Market Risk is analyzed into the following types of risks:

- <u>Interest Rate Risk</u> is the risk that the value of financial instruments and net interest income will decrease due to adverse movements in market interest rates. Interest Rate Risk arises due to timing differences in the re-pricing of interest rates or the maturity of assets and liabilities. The Bank manages interest rate risk through the monitoring on a regular basis of interest rate gaps by currency and time band.
- <u>Currency Risk</u> is the risk that the value of financial instruments and assets and liabilities fluctuates due to changes in exchange rates. Currency risk arises from a positive or negative open position in a foreign currency, exposing the Bank to changes in the relevant exchange rate. This risk may arise from the holding of assets in one currency funded by liabilities in another currency or from a spot or forward foreign exchange trade or from derivatives.
- <u>Price Risk</u> is the risk associated with changes in the market prices of various financial instruments (bonds, derivatives, equities, etc.) owned by the Bank.

# 7.2 Liquidity Risk Management Framework

The Bank operates within a Liquidity Risk management framework incorporating the following principles:

- The Bank shall have in place methodologies and supporting processes and systems in order to be able to constantly monitor regulatory liquidity indicators and control its liquidity position. A liquidity limit structure, compliant with the relevant regulatory requirements, shall cover the liquidity structure of assets for all major currencies in which the Bank operates.
- In addition to the assessment of the liquidity surplus under normal circumstances, a scenario-based stress testing methodology shall be deployed for the analysis of the Bank's liquidity profile after the deduction of 'hot monies' which may include short-term deposits, customer-term deposits that are likely to be withdrawn early. ECB funds that are subject to sovereign credit quality criteria, etc.
- The assumptions utilized in the Liquidity Risk management framework shall capture both Idiosyncratic and Systemic Risk factors.
- The Bank shall maintain adequately diversified funding sources by focusing on retail deposits rather than wholesale funding.
- Contingency plans for handling liquidity disruptions/crises shall exist and describe explicit processes for restoring cash flow shortfalls in a timely and cost-effective manner.

Liquidity Risk is monitored and controlled by the Treasury Department, the Finance Department and the Risk Management Department.

The monitoring and management of Liquidity Risk is achieved through the use and monitoring of the following:

- The concentration, diversity and maturity profile of customer deposits.
- Adopting pricing policies that contribute to establishing a stable depository base.
- Maintaining a balance in the Minimum Reserve Account as specified by the applicable Supervisory Authorities.
- The Liquidity Monitoring Metrics (ALMM) under Article 415(3)(b) of Regulation (EU) No 575/2013.
- Liquidity Coverage Ratio based on EU Regulation 2015/61 regarding the coverage requirement of Liquidity Risk.

The Bank uses liquidity stress testing and conducts an ILAAP annually to determine its liquidity tolerance and liquidity buffers. The ILAAP report gives an overview of the Bank's approach to liquidity risk management and the Board's assessment of the prudent level of liquidity resources that the Bank should hold based on its liquidity risk appetite. The liquidity stress testing covers three scenarios: An idiosyncratic, market-wide and a combined stress (i.e. combination of the idiosyncratic and marketwide). The methodology and assumptions used in the stress testing are based on conservative assumptions driven by the Liquidity Coverage Ratio (LCR) specifications and the various results are used by the Bank into developing liquidity and funding plans.

The Bank prepares the ILAAP report annually. The report for 2021 was approved by the Board of Directors and was submitted to the CBC on 2 July 2021. The ILAAP process demonstrates that the Bank and its Group have sufficient liquidity resources to support its business and be able to withstand any adverse future conditions which may threat its liquidity position. The Board signs a liquidity adequacy statement on an annual basis as part of the ILAAP.

As at 31 December 2021, at the date of the finalization of its audited Financial Statements and throughout the year, the Bank was in compliance with the required minimum Liquidity Coverage Ratio of the European Central Bank. The LCR was in effect from 1 October 2015 with a regulatory limit of 60% increasing to 100% from 1 January 2018.

| LCR ratio %                     |      |
|---------------------------------|------|
| As at 31 December 2021          | 260% |
| Average for the year            | 293% |
| Maximum percentage for the year | 368% |
| Minimum percentage for the year | 212% |
| Regulatory Limit                | 100% |

| LCR ratio %                     |      |
|---------------------------------|------|
| As at 31 December 2020          | 246% |
| Average for the year            | 294% |
| Maximum percentage for the year | 366% |
| Minimum percentage for the year | 241% |
| Regulatory Limit                | 100% |

The table below shows a quantitative analysis of LCR which complements Article 435(1)(f) of Regulation 575/2013 (Template EU LIQ1 EBA guidelines EBA/GL/2017/01 on LCR disclosure):

#### Net Stable Funding Ratio (new table)

Additionally, the Bank also calculates the Net Stable Funding Ratio (NSFR), as per the Capital Requirements Regulation II (CRR II), enforced in June 2021, with the limit set at 100%. The NSFR is the ratio of available stable funding to required stable funding. NSFR has been developed to promote a sustainable maturity structure of assets and liabilities. As at 31 December 2021, the Bank's NSFR, stood at 145% (compared to 128% at 31 December 2020). The NSFR's objective is to avoid excessive maturity mismatch between assets and liabilities and dependence on short-term funding and covers a one-year horizon.

## 7.3 Market Risk Management Framework

The Board of Directors, Board Risk Committee (RMC), Asset-Liability Committee (ALCO), Risk Management Department, the Middle Office and Treasury & Capital Markets Department are considered as the primary units involved in the Market Risk Management process.

- The <u>Board of Directors</u> approves the Market Risk Management Strategy and Policy, as well as any amendments to it. It ensures the implementation of the Market Risk Management Strategy and Policy, as well as the completeness and suitability of the Market Risk Limits Management framework. It is regularly or ad hoc if necessary updated on the evolution of market conditions as well as on the Bank's key financial figures which relate to Market Risks.
- The <u>RMC</u> preapproves the Market Risk Management Strategy and Policy, as well as any amendments, ensuring its alignment with the Risk Management Framework. It ensures the implementation of the Market Risk Management Strategy and Policy as well as the completeness and suitability of the Market Risk Limits Management framework. It is regularly or ad hoc if necessary updated on the evolution of market conditions as well as on the key financial figures of the Bank which relate to Market Risks. Lastly, it ensures the suitability and adequacy of the framework of policies, procedures, systems and general controls employed in the management of Market Risk.
- The role of the <u>ALCO</u> is to drive the Bank in maintaining its competitiveness and profitability, while at the same time ensuring that the risk undertaking will remain within the limits of the approved strategy. The ALCO sets and approves the Market Risk limits.
- Following propositions of the Bank's Treasury and Capital Markets, the Risk Management Department develops and submits for approval to RMC on behalf of the Bank the Market Risk policy and any amendments to it.

In addition to the above, the Risk Management Department with the support of the Middle Office monitors compliance with the regulatory and internal limits, manages any limit breaches by creating the necessary reports and monitors compliance measures. It is also responsible for the measurement of risk by calculating various measures and generating reports, and for developing measurement methodologies aligned to international standards and best practices.

- The Internal Audit Department is responsible for evaluating the effectiveness of the implementation of the Market Risk Management Policy. More specifically, it evaluates the effectiveness of the said policy and any related procedures, performs audits to ensure that the personnel of the involved units follow the approved policy and procedures, and verifies that the data related to Market Risk measurement are identified correctly in the systems. Finally, the Internal Audit Department evaluates compliance of the policy with the principles required by the applicable regulatory framework.
- Lastly, the Treasury & Capital Markets Department submits to the ALCO proposals for particular actions in the context of enhancing the Market Risk strategy, participates in shaping the Policy and the limits framework, and ensures compliance with the predefined limits, justifying any limit breach and the application of necessary compliance actions.

The Bank has exposure to financial transactions included in Financial Assets at Fair Value Through Profit and Loss. These have short to medium term horizon and their profit derives from differences in buy-sell

prices. These portfolios include positions which hedge risk deriving from other transactions in products categorized in Trading portfolio. The Bank maintains small positions in its Trading Book and as a result market risk is not significant.

The table below shows the capital requirements for the Trading Book by risk category:

|   |   | а   | а                            |  |
|---|---|-----|------------------------------|--|
|   | €thousands                                |     | RWEAs<br>31 December<br>2020 |  |
|   | Outright products                         |     |                              |  |

#### Template 29: EU MR1 EBA guidelines – Market risk under the standardised approach

## Fair value of bonds, shares and other financial instruments

The best evidence of fair value is a quoted price in an actively traded market. The fair value of bonds, shares and other financial instruments that are not traded in an active market is determined by using valuation techniques. The majority of valuation techniques employed by the Bank use only observable market data and so the reliability of the fair value measurement is relatively high. However, certain financial instruments are valued on the basis of valuation techniques that feature one or more significant inputs that are not observable. Valuation techniques that rely on non-observable inputs require a higher level of management judgement to calculate a fair value than those based wholly on observable inputs. Changes in these estimates and assumptions could affect the fair value of the relevant financial instruments.

## 7.3.1 Interest Rate Risk

Interest Rate Risk is measured using interest rate sensitivity gap analysis. The annual impact of any change in interest rates on profit is calculated by multiplying the net asset or liability position repricing in each time band with the assumed change in interest rates.

The Bank monitors Interest Rate Risk by measuring the sensitivity of Net Interest Income, for a period of 12 months, under various interest rate change scenarios. The table below shows the impact on Net

Interest Income (over the next 12 months) as a result of a change of  $\pm 200$  basis points in interest rates by currency as at 31 December 2021:

| As at 31 December 2021 | Euro  | US     | Swiss Franc | Total (absolute |
|------------------------|-------|--------|-------------|-----------------|
| Change (€ milion)      | Euro  | Dollar |             | values)         |
| +200 basis points      | -8.40 | -2.30  | N/A         | 10.70           |
| -200 basis points      | 8.40  | 2.30   | N/A         | 10.70           |

| As at 31 December 2020 | Euro  | US     | Swiss Franc | Total (absolute |
|------------------------|-------|--------|-------------|-----------------|
| Change (€ milion)      | Edio  | Dollar |             | values)         |
| +200 basis points      | -6.50 | -2.60  | N/A         | 9.10            |
| -200 basis points      | 6.50  | 2.60   | N/A         | 9.10            |

Interest Rate Risks are identified, measured and managed at all times and on a best effort basis. All Interest Rate Risks assumed are communicated to the Treasury & Capital Markets Department, which is responsible for their effective management, within approved limits. Interest Rate Risk limits are set and monitored against the exposure of all interest rate sensitive assets and liabilities, both on and off-balance sheet and limit excesses are reported to the relevant parties immediately.

## 7.3.2 Currency Risk

Currency Risk may arise from the holding of assets in one currency funded by liabilities in another currency or from a spot or forward foreign exchange trade or from derivatives. The Bank enters into foreign exchange transactions in order to accommodate customer needs and to hedge its open positions. The Bank's Treasury Unit also enters into spot foreign exchange transactions within predefined and approved limits, as well as transactions in derivatives such as foreign exchange forwards and foreign exchange swaps.

The table below reflects the Bank's exposure to Currency Risk which stems from its open positions in the various currencies as at 31 December 2021. The analysis below assumes possible scenarios of movements to take place in specific foreign currencies against the Euro.

| As at 31 December 2021 | Change in exchange<br>rates | Impact on Income Statement |
|------------------------|-----------------------------|----------------------------|
| Currency               | %                           | €thousands                 |
| US Dollar              | +10% (-10%)                 | +26 (-26)                  |
| British Pound          | +10% (-10%)                 | -3 (+3)                    |
| Swiss Franc            | +10% (-10%)                 | -31 (+31)                  |
| Other currencies       | +10% (-10%)                 | -79 (+79)                  |

| As at 31 December 2020 | Change in exchange<br>rates | Impact on Income Statement |
|------------------------|-----------------------------|----------------------------|
| Currency               | %                           | €thousands                 |
| US Dollar              | +10% (-10%)                 | +31 (-31)                  |
| British Pound          | +10% (-10%)                 | -3 (+3)                    |
| Swiss Franc            | +10% (-10%)                 | -153 (+153)                |
| Other currencies       | +10% (-10%)                 | -68 (+68)                  |

## 7.3.3 Price Risk

The Bank invests in listed and non-listed equity shares which, depending on the purpose of the investment, are classified in the appropriate portfolio. Currently all investments in equity securities, except for investments in subsidiaries, are classified at FVTOCI and FVTPL.

For more information in relation to equities refer to notes 19 & 20 of the Financial Statements for the year ended 31 December 2021.

## 8. OPERATIONAL RISK

# 8.1 Definition of Operational Risk

Operational Risk is defined as the risk of loss deriving from inadequate or failed internal processes, people and systems or from external events. This definition also includes legal, conduct and reputational risks. The underlying causes of the Operational Risk are mitigated through procedures, systems and internal controls.

## 8.2 Operational Risk Management procedures

The Bank establishes policies and procedures for managing Operational Risk and ensures that these are adhered to in the conduct of its operations. Operational Risk is managed by establishing internal processes and controls involving:

- Segregation of duties, including independent authorization of transactions, the reconciliation and monitoring of transactions, documentation of controls and procedures.
- Compliance with regulatory and other legal requirements,
- Development of business continuity and disaster recovery plans,
- Personnel training,
- Risk mitigation by taking out insurance cover,
- Own knowledge of the business,
- Risk and Control Self-Assessment (RCSA),
- Internal Audit Reports,
- External Audit Reports.

Internal Audit has the responsibility of reviewing periodically the above procedures and controls.

## 9. ASSET ENCUMBRANCE

An asset is classified as encumbered if it has been pledged as collateral against secured funding and other collateralized obligations and, as a result, is no longer available to the Bank for further collateral or liquidity requirements. In general the Bank, will not have significant proportions of encumbered asses, however, the Bank may decide to pledge the pool of available eligible debt securities, if the need arises, as a possible source of immediate funding for the Bank.

In recognition of the challenging credit environment during the pandemic period, the Governing Council of the ECB announced that the interest rate on all outstanding TLTRO III operations for the periods from 24 June 2020 to 23 June 2021 and 24 June 2021 to 23 June 2022 will be 50 basis points below the average rate applicable in the Eurosystem's main refinancing operations over the same period. The interest rate on the main refinancing operations is currently at 0%. For the counterparties whose eligible net lending reaches the lending performance thresholds, the interest rate applied over the periods from 24 June 2020 to 23 June 2021 and 24 June 2021 to 23 June 2022 on all TLTRO III operations outstanding will be 50 basis points below the average interest rate on the deposit facility prevailing over the same period, and in any case not higher than minus 1%. The deposit facility rate until June 2022 was minus 0,5%.

Despite the Bank's comfortable liquidity position, given the favourable rate the Bank during 2020 and 2021 proceeded with TLTRO transactions where it pledged bonds to receive cash. As at 31 December 2021, ECB funding amounted to 500 million (2020: €400 million) and was borrowed from various TLTRO III operations. (2020: €300 million TLTRO and PELTRO of €100 million). The following tables present an analysis of the encumbered and unencumbered assets and the extent to which these assets are currently pledged for funding or other purposes.

#### 10. LEVERAGE RATIO

The Basel III framework introduced a simple, transparent, non-risk-based Leverage Ratio to act as a credible supplementary measure to the risk-based capital requirements.

The Leverage Ratio is defined as the capital measure (i.e. the Bank's Tier 1 capital) divided by the exposure measure as this is defined in the European Commission's Regulation (EU) 2015/62 of 10 October 2014 amending Regulation (EU) No 575/2013 of the European Parliament and of the Council. The Bank calculates its Leverage Ratio as at the end of each quarter.

As per CRR applicable as from June 2021, the minimum required level for the purposes of the Leverage Ratio is currently set at 3%. The Bank's Leverage Ratio as at 31 December 2021 amounted to 6,26%. During 2021, the Leverage Ratio ranged between 5,73% (30 September 2021) and 6,33% (31 March 2021), primarily due to the reduction of the exposure measure (denominator) and the increase of the Tier 1 capital (numerator) of the Leverage Ratio by the end of the fourth quarter.

The Bank monitors its Leverage Ratio at least on a quarterly basis and all appropriate measures are taken where deemed necessary. The following table provides a reconciliation of accounting assets and leverage ratio exposures for reporting date 31 December 2021:

The risk of the excessive leverage is the risk resulting from the Bank's vulnerability due to leverage or contingent leverage that may require unintended corrective measures to its business plan, including distressed selling of assets which might result in losses or in valuation adjustments to its remaining assets. As a minimum regulatory requirement a Bank's Leverage ratio must be at least 3% of a non-risk-weighted exposure amount that roughly corresponds to the Bank's total assets. Therefore, Leverage ratio establishes a minimum level for the amount of capital the Bank must hold. The relevant thresholds of the leverage ratio have been set at 3,75% for the red level and 4,50% for the amber level. A leverage ratio below these points would indicate a significant change in the Bank's leverage position and would indicate the need for early action and close monitoring. The above thresholds are defined in the Bank's Risk Appetite Statement and are used for the formulation of the Bank Recovery Plan.

It is noted that the leverage ratio is calculated on a quarterly basis and is reported through the production of the Recovery and Risk Appetite Limits dashboard which is submitted to Executive Management, BoD and the RMC.

## **11. REMUNERATION DISCLOSURES**

This section discloses information relating to the remuneration policies and procedures of AstroBank Public Company Limited and sets out some remuneration details with regards to those members of management and staff who, as at 31 December 2021 were considered to have material impact on the Bank's risk profile.

The Bank's remuneration policy supports a performance culture that aligns the organization's objectives with the stakeholders' interests and motivates the employees to continue to act in a way that is beneficial for the Bank.

The remuneration policy is based on the following principles:

- Maximize Performance
- Attract and retain talents
- Align earnings and reward with profitability. risk. capital adequacy and sustainable growth
- Comply with the regulatory framework
- Ensure internal transparency.

#### 11.1 Nomination and Remuneration Committee

The Board has established a Nomination and Remuneration Committee ("NR Committee") with the objective of the delegation of its duties concerning the Bank's remuneration policy and the oversight required to ensure its proper implementation. maintenance and update.

In relation to nomination matters, the NR Committee is responsible to:

- Propose to the Board a person or persons suitable to succeed the Chairman or the Managing Director in case of resignation or permanent inability for any reason to perform their duties during their term of office.
- Propose to the Board an individual or individuals suitable to replace the Directors in case of resignation, disqualification from the office or permanent inability to discharge their duties for any reason during their term of office. Non-acceptance of appointment as Board member shall be treated in the same way as a resignation.
- For the purposes of the first paragraph above, decide on setting the target for the representation of the under-represented sex in the governing body and prepare the policy on increasing the number of the under-represented sex on the governing body, in order to realize this objective. The aim of the policy and its application are published in accordance with the provisions of Article 435 paragraph (2) (c) of Regulation (EU) No. 575/2013.
- Ensure that decision-making by the Board is not dominated by a single person or small group of individuals in a manner prejudicial to the interests of the institution as a whole.
- Evaluate annually the skills, knowledge and expertise of the Directors, and report thereon to the Board.
- Evaluate annually the structure, size, composition and performance of the Board of Directors and make recommendations to the Board for any changes.
- Examine issues related to the design of succession.

- Review periodically the policy of the Board of Directors on the selection, development and appointment of senior management and Key Function Holders and make recommendations to the Board.
- Review periodically the policy of the Bank on the recruitment, job rotation and promotion of staff and submit relevant reports to the Board.

As far as issues relating to remuneration. the NR Committee is responsible to:

- Define the policy of the Bank on remuneration and other benefits received by the Executive Members of the management and other employees of the Bank in accordance with the relevant Central Bank Directive and taking into account where applicable, the Collective Agreements between the Cyprus Bankers Employers' Association and the Cyprus Union of Bank Employees (ETYK).
- Review every year the Remuneration Policy and ensure its implementation.
- Ensure that the Executive Members of the Bank receive remuneration and benefits commensurate with their duties and responsibilities, capable to attract and retain executives of high caliber and efficiency and which are commensurate to those given by other financial institutions of comparable size and business operations in Cyprus and abroad. In determining the remuneration of each member, his/her contribution to the achievement of the Bank's objectives shall be taken into account.
- Align the interests of shareholders with those of the Executive Members of the Management through regular or special bonuses linked to the profitability or return on equity, or generally the financial results of the Bank, whilst ensuring avoidance of excessive risk taking.
- Examine the obligations arising in the case of early termination of contracts of Executive Directors / Directors (including their pension rights).
- Ensure that the Internal Control Functions are involved in the design, review and implementation of the remuneration policy.

The NR Committee may meet with the frequency it deems necessary, but at least once per year. During 2021 the Committee held six meetings.

As at 31 December 2021 the Nomination and Remuneration Committee comprised of a Non-Executive director (also the chairman) and two Independent Non-Executive directors.

## **11.2** Remuneration Policy

The Bank's Remuneration Policy is according to the signed collective agreement with the Bank Employees Trade Union (ETYK) and aims to be in line with the Bank's business strategy and objectives. The Remuneration Policy is consistent with the effective management of risk and does not encourage excessive risk-taking by staff members. The remuneration policy is gender neutral.

## **11.2.1** Assessment of employee performance

The management of the performance of human resources and the utilization of skills are crucial for the improvement of the efficiency of the Bank and for the continuous increase in the value given by the Bank to its clients, shareholders and collaborators. Within 2021, the Bank adopted its own 'Competency Framework' which describes the desired behaviors and skills that should characterize the Bank's staff at all hierarchical levels (employees-middle management-senior management) for the best performance of the employee and consequently the Bank.

A new automated performance appraisal system was also applied, via the SAP Success Factors software. The aim of the Bank was for the new appraisal system to be a firm tool for capturing and better managing the performance of individuals, and consequently of their divisions/ departments / units, etc. For this reason, care has been taken to provide a complete and easy-to-use tool that would enable a fast response rate to performance and staff development issues. Staff Performance Appraisals were successfully carried out during 2022 for year 2021 and Key Performance Indicators (KPIs) have been assigned across all levels of the Bank for 2022.

# 11.2.2 Fixed remuneration

Fixed remuneration within the Bank is structured based on salary scales which are determined according to each employee's grade and basic salary. Fixed remuneration is usually determined by the provisions of the Collective Agreement with Cyprus Union of Bank Employees. effective at the time. or individual employment contracts. Fixed remuneration cannot be reduced. suspended or cancelled. does not depend on performance and does not provide incentives for risk assumption. The percentage of established posts as per the Collective Agreement is set to a minimum of 33% of the total number of staff of the Bank. and a calculation of the established posts percentage is performed annually on 31<sup>st</sup> October. with the purpose of any resulting changes to become effective on 1<sup>st</sup> January of the following year. It is noted that the percentage of established posts as at 31 December 2021 was well above the minimum percentage as defined in the collective agreement. Non-Executive directors receive a fixed remuneration package approved by the General Meeting upon the recommendation of the NR Committee each year.

## 11.2.3 Variable remuneration

Variable Remuneration covers all permanent employees (with at least 6 months permanent service within the year that the bonus will be paid) with special emphasis on staff who have a material impact on the Bank's Risk Profile, the staff of Control Functions and any employee whose total earnings are in the same level of remuneration as Senior Executives and is based on the guidelines of the Central Bank of Cyprus.

Identification of staff whose activities have or may have a material impact on the Bank's Risk Profile is made by an annual self-assessment and is based on the Qualitative and Quantitative Criteria set out in Commission Delegated Regulation (EU) No 604/2014.

Based on the guidelines of the Central Bank of Cyprus ("CBC"), Variable Remuneration is determined as a combination of the performance evaluation of the individual, the performance of his/her business unit and the overall results of the Bank. Financial and non-financial criteria are determined by the Bank's CEO and approved by the Board after being examined by the Nominations and Remuneration Committee.

A substantial portion, and in any event at least fifty percent (50%) of any variable remuneration shall consist of a balance of the following:

• shares or equivalent ownership interests, subject to the legal structure of the Bank concerned or share-linked instruments or equivalent non-cash instruments, in the case of a non-listed Bank

• where possible, other instruments within the meaning of Article 52 or 63 of Regulation (EU) No 575/2013 or other instruments which can be fully converted to Common Equity Tier 1 instruments or written down, that in each case adequately reflect the credit quality of the Bank as a going concern and are appropriate to be used for the purposes of variable remuneration.

A significant part of the variable remuneration (at least forty per cent (40%) shall be retained and its payment be deferred for a period of at least three years and depends on the Bank's performance, the risks faced by the Bank and the activities of the person concerned. The amount retained is vested over time in proportion to the time, provided that it can be paid on the basis of the Bank's overall financial situation and the Annual Results of the Bank and the performance of the business unit and of the individual concerned.

If the percentage of variable remuneration is particularly high then the payment is deferred, at least by 60% of the amount. Again, the postponement period depends on the Bank's financial situation and the individual's activities.

The ratio between fixed earnings and variable earnings is such that the fixed component shall be a high proportion of total remuneration, in order to allow the Bank to be flexible to distribute variable remuneration and to be able not to pay variable remuneration. The Bank determines that the variable remuneration shall not exceed fifty percent (50%) of fixed earnings. Shareholders or owners of the Bank may approve a higher ratio between fixed and variable earnings but should not exceed one hundred percent (100%) of the fixed earnings of each individual.

#### Remuneration awarded during the year

The fixed remuneration of the staff for 2021 and 2020, as presented in the below tables includes salaries and other short-term benefits as well as employer's contributions and compensation paid to staff who left the Bank under voluntary retirement plan. During 2020 and 2021, the Bank did not offer to any employee remuneration payment which exceeded the threshold of €1 million, therefore "Template EU REM4 - Remuneration of 1 million EUR or more per year" is not applicable to the Bank.

One Non-Executive director who resigned on 15 December 2021 had total emoluments of €558K up to the 15<sup>th</sup> of December 2021, including €300K as termination benefit.

During 2021 due to "voluntary retirement plan exits" as well as to "natural attrition exits" duplicate positions were included in the number of identified staff as well as to the remuneration figures in the tables below. More specifically, there were two Chairmen of the BoD, two CEOs, two CFOs, two Heads of Human Resources, two Alternate AMLCOs, two Heads of Credit, two Heads of Retail Banking and two Heads of Treasury and Capital Markets.

Variable Remuneration in 2021 refers to coupons awarded to identified staff by the Bank under a Scheme approved by board in 2020.

### **12. OPERATING ENVIRONMENT**

#### Cyprus Economy Performance and economic outlook

The outbreak of COVID-19 in 2020 found Cyprus in a very strong macroeconomic and fiscal position. This allowed for a significant fiscal support package to be offered relieving in large the effects of the crisis. The emergency measures taken by the Government of the Republic of Cyprus contained the crisis' effects across the economy. The banking sector entered the crisis with capital and liquidity buffers and with the support of the ECB's monetary policy, facilitated the provision of liquidity to the economy.

During 2021, Cyprus's real GDP increased by 5,5% compared to 2020 suggesting gradual growth.

The Cyprus economy is recovering although the uncertainty related to the coronavirus (COVID-19) pandemic remains. Although restrictions on mobility affected a number of industries where the economy depends on such as trade, transport, hospitality these exhibited higher growth rates during the second half of 2021. This growth resulted in positive movements in employment and household consumption indices. Despite the emergence of the Omicron Variant and the rise of recorded infections, the economy remains on a recovery track. Following the 5,0% decline in GDP in 2020, and the real GDP growth of 5,5% in 2021, it is expected that GDP will grow by 3,8% in 2022.

The unemployment rate for 2021 decreased slightly to 7,5% while it is projected to move around 6.7% by the end of 2022.

In the banking sector, total non-performing exposures at the end of November 2021 were €4,2 billion or 15,1% of gross loans compared to 17,7% at the end of 2020, while the coverage ratio was 47,7%.

The sovereign risk ratings of the Cyprus Government improved considerably in recent years reflecting improvements in economic resilience and consistent fiscal outperformance after 2013. The Republic of Cyprus is currently rated at an investment grade rating of BBB- by S&P and Fitch and at a non-investment grade rating of Ba1 by Moody's. In July 2021, Moody's upgraded the rating for the Cyprus sovereign to Ba1 from Ba2, one notch below investment grade. In September 2021 S&P affirmed its rating for Cyprus. Similarly, in April 2021, Fitch affirmed its Cyprus rating and revised its outlook to stable, reflecting the significant impact the global COVID-19 pandemic might have on the Cyprus economy and fiscal position.

The economy is likely to be impacted due to the latest developments in Ukraine and Russia with a possible effect on the inflows of tourist arrivals from Russia and Ukraine as 25% of the total arrivals were originated from the aforementioned countries. Additionally inflationary pressure is expected due to higher prices in energy, agricultural products and various raw materials. Additional uncertainty is created due to the coordinated implementation of sanctions by the EU, UK and the U.S imposed against Russia, Belarus and certain regions of Ukraine and certain Russian entities and nationals. The Group's policy is to comply with all applicable laws, including sanctions and export controls.

#### 14. ANNEX II – Summary of the Bank's Risk Appetite Statement

The Bank's Risk Appetite is determined so as not to exceed the risk capacity. given current business conditions. and ensure the Bank's operational smoothness. the implementation of its strategic objectives as well as the achievement of satisfactory performance. In parallel, it is ensured that under adverse business and macroeconomic conditions the risk capacity can absorb unexpected losses and/or commitments. safeguarding a minimum level of solvency as well as depositors' and shareholders' interests.

The risk appetite statements are in the form of qualitative statements and quantitative limits and indicate how the Bank addresses material risks at an aggregated level. The quantitative measures. specify the risk appetite statements in particular risk categories as defined by specific Key Risk Indicators (e.g. solvency risk. liquidity risk. etc.) which are utilized to monitor the Bank's Risk Profile.

The qualitative risk appetite statements delineate the Bank's position during the development and implementation of the Strategic Plan. both in general terms and in respect of special risk types. The quantitative statements are a set of key measurable indicators that define the maximum level of risk that the Bank wishes to undertake.

Some of the main Risk Appetite Statements are presented below:

#### **RISK APPETITE STATEMENTS**

- The overall Bank Risk Appetite Framework ("RAF") is set with due regard to current economic and business conditions.
- The RAF is dynamic and subject to revision from time to time to reflect changing economic and business conditions.
- The aim of the RAF is not to minimize risk per se but achieve a reasonable balance between risk and return. within an overall conservative perspective.
- The Bank must maintain sufficient liquidity and capital buffers and achieve stable and recurring profitability.
- The Bank aims to maintain a culture of continuous improvement of processes. policies. models and tools for measuring and monitoring risk exposures.
- The Bank aims to maintain an internal communication policy and culture that strengthens the confidence of customers. shareholders and employees.
- The Bank aims to ensure the availability and adequacy of resources necessary for the effective operation of the RAF.
- The Bank aims in the avoidance of any Anti-Money Laundering (AML) & Counter Terrorist Financing (CTF) risks.
- The Bank aims to take all necessary measures to ensure compliance with all applicable laws and regulations.
- The Bank aims to maintain a strong and stable capital base that supports its business plans and safeguards the ability to continue its operations smoothly.
- The Bank endeavors to maintain capital adequacy ratios in the medium term. above the minimum regulatory limits. in order to ensure the confidence of depositors and shareholders providing sufficient armor against the challenges of economic and business conditions.

• The Bank shall maintain adequate infrastructure. policies. processes and methodologies to support and meet the supervisory and regulatory compliance needs.

The following Key Risk Indicators are utilized to monitor the Bank's Risk Profile:

| SOLVENCY RISK  |
|--|
| CET1 Ratio 1   |
| Total Capital Adequacy Ratio                                 |
| MREL – TREA  |
| MREL - LRE   |
| Leverage Ratio   |
| LIQUIDITY RISK   |
| Liquid Assets/Deposits                                       |
| LCR  |
| NSFR   |
| CREDIT RISK & ASSET QUALITY                                  |
| NPE Ratio  |
| NPE Provisions Coverage                                      |
| 90 DPD Ratio   |
| Growth rate of non-performing loans                          |
| Concentration Limits   |
| OTHER LIMITS   |
| Direct Exposures to Sovereign                                |
| Non-Investment Grade Non-EU debt securities                  |
| PROFITABILITY  |
| NIM (annualized YTD)   |
| Cost to Income (excluding extraordinary income and expenses) |
| Return on Equity   |

The following table sets out a number of the Bank's Key Performance Indicators utilized to monitor its risk profile based on the actual results as at 31 December 2021 and 2020:

| Key Performance Indicators |                                   | 2021       | 2020       |
|----------------------------|-----------------------------------|------------|------------|
| Capital                    | CET1 and Total Capital            | 15,31% and | 13.84% and |
|                            | (Transitional) Ratio              | 16,58%     | 15,01%     |
| Efficiency                 | Net Interest Margin               | 1,8%       | 2,1%       |
|                            | Cost / Income                     | 77,8%      | 88,6%      |
| Asset Quality              | NPEs Provisions Coverage<br>Ratio | 44,9%      | 43,9%      |
|                            | NPE Ratio                         | 25,6%      | 30,3%      |
| Liquidity                  | Liquid assets / Deposits          | 75%        | 71,7%      |
|                            | NSFR                              | 145%       | 127,6%     |
|                            | Liquidity Coverage Ratio          | 260%       | 246,0%     |
| Profitability              | Return on Average Assets          | 0,1%       | (0,7)%     |
|                            | Return on Average Equity          | 1,7%       | (9,8)%     |

#### **Risk Appetite Monitoring and Escalation Process**

The Risk Management Department monitors the Risk Appetite Limits regularly through early warning triggers and informs the Executive Management in order to trigger corrective actions. Breaches are also reported to the Board Risk Committee and Board at their next scheduled meeting or earlier if deemed necessary.

#### 16. ANNEX: IV - List of EBA Templates disclosures and cross reference with Pillar III Disclosures

| 16. ANNEX: IV - List of EBA Templates disclosures and cross reference with Pillar  | Pillar III Disclosures               |  |
|--|--------------------------------------|--|
| EBA TEMPLATE   | reference                            |  |
| EU OV1 – Overview of risk weighted exposure amounts  | Section 4.4                          |  |
| EU KM1 - Key metrics template  | Section 4.5                          |  |
| EU INS1 - Insurance participations   | Section 8.4                          |  |
| EU INS2 - Financial conglomerates information on own funds and capital adequacy ratio  | Not Applicable                       |  |
| EU OVC - ICAAP information   | Section 6.7                          |  |
| EU OVA - Institution risk management approach  | Sections 3, 6.2, 7.2,<br>7.3 and 8.2 |  |
| EU OVB - Disclosure on governance arrangements   | Section 3                            |  |
| EU LI1 - Differences between accounting and regulatory scopes of consolidation and mapping of financial statement categories with regulatory risk categories | Section 4.4                          |  |
| EU LI2 - Main sources of differences between regulatory exposure amounts and carrying values in financial statements   | Section 4.4                          |  |
| EU LI3 - Outline of the differences in the scopes of consolidation (entity by entity)  | ANNEX I                              |  |
| EU LIA - Explanations of differences between accounting and regulatory exposure amounts  | Section 4.2                          |  |
| EU LIB - Other qualitative information on the scope of application   | Not applicable                       |  |
| EU PV1: Prudent valuation adjustments (PVA)  | Section 4.5                          |  |
| EU CC1 - Composition of regulatory own funds   | Section 4.1                          |  |
| EU CC2 - reconciliation of regulatory own funds to balance sheet in the audited financial statements   | Section 4.2                          |  |
| EU CCA: Main features of regulatory own funds instruments and eligible liabilities instruments   | ANNEX III                            |  |
| EU CCyB1 - Geographical distribution of credit exposures relevant for the calculation of the countercyclical buffer  | Section 4.3                          |  |
| EU CCyB2 - Amount of institution-specific countercyclical capital buffer   | Section 4.3                          |  |
| EU LR1 - LRSum: Summary reconciliation of accounting assets and leverage ratio exposures   | Section 10                           |  |
| EU LR2 - LRCom: Leverage ratio common disclosure   | Section 10                           |  |
| EU LR3 - LRSpl: Split-up of on balance sheet exposures (excluding derivatives, SFTs and exempted exposures)  | Section 10                           |  |
|  | Section 10                           |  |
| EU LRA: Free format text boxes for disclosure on qualitative items   |                                      |  |
| EU LIQA - Liquidity risk management  | Section 7.2                          |  |
| EU LIQ1 - Quantitative information of LCR  | Section 7.3                          |  |

| EU LIQB on qualitative information on LCR, which complements template  | Section 7.3         |
|--|---------------------|
| EU LIQ2: Net Stable Funding Ratio  | Section 7.3         |
| EU CRA: General qualitative information about credit risk  | Section 6           |
| EU CRB: Additional disclosure related to the credit quality of assets  | Section 6.6         |
| EU CR1: Performing and non-performing exposures and related provisions   | Section 6.5         |
| EU CR1-A: Maturity of exposures  | Section 6.5         |
| EU CR2: Changes in the stock of non-performing loans and advances  | Section 6.5         |
| EU CR2a: Changes in the stock of non-performing loans and advances and related net   | Section 6.5         |
| accumulated recoveries   |                     |
| EU CQ1: Credit quality of forborne exposures   | Section 6.5         |
| EU CQ2: Quality of forbearance   | Section 6.5         |
| EU CQ3: Credit quality of performing and non-performing exposures by past due days   | Section 6.5         |
| EU CQ4: Quality of non-performing exposures by geography   | Section 6.5         |
| EU CQ5: Credit quality of loans and advances by industry   | Section 6.5         |
| EU CQ6: Collateral valuation - loans and advances  | Section 6.5         |
| EU CQ7: Collateral obtained by taking possession and execution processes   | Section 6.5         |
| EU CQ8: Collateral obtained by taking possession and execution processes – vintage breakdown                                       | Section 6.5         |
| EU CRC – Qualitative disclosure requirements related to CRM techniques   | Section 6.4         |
| EU CR3 – CRM techniques overview: Disclosure of the use of credit risk mitigation techniques                                       | Section 6.4.6       |
| EU CRD – Qualitative disclosure requirements related to standardised model   | Section 6.3 and 6.4 |
| EU CR4 – standardised approach – Credit risk exposure and CRM effects  | Section 6.4.6       |
| EU CR5 – standardised approach   | Section 6.4.6       |
| EU CRE – Qualitative disclosure requirements related to IRB approach   | Not applicable      |
| EU CR6 – IRB approach – Credit risk exposures by exposure class and PD range   | Not applicable      |
| EU CR6-A – Scope of the use of IRB and SA approaches   | Not applicable      |
| EU CR7 – IRB approach – Effect on the RWEAs of credit derivatives used as CRM techniques   | Not applicable      |
| EU CR7-A – IRB approach – Disclosure of the extent of the use of CRM techniques  | Not applicable      |
| EU CR8 – RWEA flow statements of credit risk exposures under the IRB approach  | Not applicable      |
| EU CR9 –IRB approach – Back-testing of PD per exposure class (fixed PD scale)  | Not applicable      |
| EU CR9.1–IRB approach – Back-testing of PD per exposure class (only for PD estimates according to point (f) of Article 180(1) CRR) | Not applicable      |
| EU CR10 – Specialised lending and equity exposures under the simple risk weighted approach   | Not applicable      |
| EU CCRA – Qualitative disclosure related to CCR  | Section 6.6         |
| EU CCR1 – Analysis of CCR exposure by approach   | Section 6.6         |
| EU CCR2 – Transactions subject to own funds requirements for CVA risk  | Section 6.6         |

| EU CCR3 – Standardised approach – CCR exposures by regulatory exposure class and   |                |
|--|----------------|
| risk weights   | Section 6.6    |
| EU CCR4 – IRB approach – CCR exposures by exposure class and PD scale  | Not applicable |
| EU CCR5 – Composition of collateral for CCR exposures  | Section 6.6    |
| EU CCR6 – Credit derivatives exposures   | Section 6.6    |
| EU CCR7 – RWEA flow statements of CCR exposures under the IMM  | Not applicable |
| EU CCR8 – Exposures to CCPs  | Section 6.6    |
| EU-SECA - Qualitative disclosure requirements related to securitisation exposures  | Not applicable |
| EU-SEC1 - Securitisation exposures in the non-trading book   | Not applicable |
| EU-SEC2 - Securitisation exposures in the trading book   | Not applicable |
| EU-SEC3 - Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as originator or as sponsor | Not applicable |
| EU-SEC4 - Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as investor                 | Not applicable |
| EU-SEC5 - Exposures securitised by the institution - Exposures in default and specific credit risk adjustments   | Not applicable |
| EU MRA: Qualitative disclosure requirements related to market risk   | Section 7      |
| EU MR1 - Market risk under the standardised approach   | Section 7.3    |
| EU MRB: Qualitative disclosure requirements for institutions using the internal Market<br>Risk Models  | Not applicable |
| EU MR2-A - Market risk under the internal Model Approach (IMA)   | Not applicable |
| EU MR2-B - RWA flow statements of market risk exposures under the IMA  | Not applicable |
| EU MR3 - IMA values for trading portfolios   | Not applicable |
| EU MR4 - Comparison of VaR estimates with gains/losses   | Not applicable |
| EU ORA - Qualitative information on operational risk   | Section 8      |
| EU OR1 - Operational risk own funds requirements and risk-weighted exposure amounts  | Section 8.3    |
| EU REMA - Remuneration policy  | Section 11.2   |
| EU REM1 - Remuneration awarded for the financial year  | Section 11     |
| EU REM2 - Special payments to staff whose professional activities have a material impact on institutions' risk profile (identified staff)                  | Section 11     |
| EU REM3 - Deferred remuneration  | Section 11     |
| EU REM4 - Remuneration of 1 million EUR or more per year   | Not applicable |
| EU REM5 - Information on remuneration of staff whose professional activities have a  |                |
| material impact on institutions' risk profile (identified staff)   | Section 11.2.3 |
| EU AE1 - Encumbered and unencumbered assets  | Section 9      |
| EU AE2 - Collateral received and own debt securities issued  | Section 9      |
| EU AE3 - Sources of encumbrance  | Section 9      |
| EU AE4 - Accompanying narrative information  | Section 9      |
